Prorifi3D i3 is a bug fixed, fully upgraded version of the original i3.

This is a **FULLY ASSEMBLED**, factory fine-tuned 3D printer.

FULL FEATURES LIST

NEW FEATURES

- **Removable magnetic spring steel sheet with PEI surface** (*)
- Brand new **EINSY RAMBo** motherboard
- Silent **Trinamic drivers** with 256 microstepping
- Maximum travel speed up to **200 mm/s**
- Sensorless homing for X and Y axes
- Detection and **recovery of shifted layers**
- **Improved frame rigidity** with extrusions
- **Power loss detection and recovery**
- Better cooling from both sides of the object
- Optional WIFI with **Octoprint interface**
- **Bondtech extruder drive** - filament is driven from both sides
- **IR filament sensor**
- Automatic loading of when is inserted
- Both extruder cooling fan and print cooling fan **detect RPM**. When extruder fan is blocked, the printer will stop to prevent damage of extruder. The same applies for the print cooling fan.
- Extra silent **Noctua fan**

* Consumable parts, such as PEI sheets (smooth, textured, etc.) are not covered by warranty as the coatings are designed to diminish over time unless failure has occurred due to a defect in materials or workmanship. Cosmetic damage, including but not limited to scratches, dents, cracks or other cosmetic damage is also not covered by the warranty. Only defective sheets on arrival are covered by warranty.

BASIC FEATURES

- **Great build volume** – 11,025 cm³ (25 x 21 x 21 cm or 9,84 x 8,3 x 8,3 in) (X×Y×Z)
- Integrated LCD and SD card controller (8GB included)
- **0.4mm nozzle** (easily changeable) for 1.75 mm filament
- Layer height from **0.05 mm**
- **Automatic mesh bed**
- **Heatbed with cold corners compensation** – for 3D printing from any material
- **Automatic skew axes compensation**
- **Hassle free PEI print surface** - no glass, no glue, no ABS juice
- Supported materials – **PLA, ABS, PET, HIPS, Flex PP, Ninjaflex, Laywood, Laybrick, Nylon, Bamboofill, Bronzefill, ASA, T-, Carbon-fibers enhanced filaments, Polycarbonates...**
- Easy multicolor printing based on layer height
- **Kit box dimensions:** 11 kg, 42×43×24 cm; 16.5×16.9×9.5 in (D×H×W)
- **Assembled printer box dimensions:** 11 kg, 54×48×54 cm; 21×18.9×21 in (D×H×W)
- **Printer dimensions (without spool):** 8 kg, 55×40×50 cm; 21.6×15.7×19.6 in (D×H×W)
- **Power consumption:** PLA settings: 80W / ABS settings: 120W
