Our main business:

Marketing services of computer peripheral devices.

Do you want to know how promote your computer peripheral devices into different countries' markets? Contact us! We will offer you the best solutions!

Tap the potential of new products

In-depth analysis of product sales trends, traffic sources, and user feedback, accurately pinpoint industry development trends, explore the blue ocean market, and help sellers discover products with the most growth potential.

Insight into market opportunities

Full-view insights into the latest market trends and consumer preferences of designated categories on Amazon's global sites, and provide comprehensive market analysis reports for millions of sellers.

Category Analysis Report

In-depth analysis of the industry from multiple levels of market size, growth rate, competitors, etc., so as to find the entry point for winning products, fully identify the competitive situation, and clarify the space for optimization.

Accurately forecast sales

Through statistics and analysis of historical rankings and sales volume, historical sales trends can be obtained. Precisely predict future sales, help you easily stock up, avoid risks, and control the overall situation.

Reviews intelligent analysis

The self-developed text topic model is used to effectively analyze the review retention rate, which is convenient for adjusting the Listing optimization direction and product iteration planning.

Keyword Research

Accurately measure keyword traffic, and in-depth analysis of similarities and differences, to help sellers from selecting high-traffic words, precise CPC bidding to mining explosions in full closed-loop operation.

Precise prediction

The most reliable sales forecast tool, accurately forecast product sales, gain insight into market segment opportunities, and easily control the essence of product selection.

Multi-dimensional filtering

Fully capture market intelligence, including 14 dimensions such as price, sales volume, BSR ranking, category, etc., to help sellers discover products with the most growth potential.

The screenshot shows a complex filtering interface with multiple tabs and filters. The main area displays a grid of product data with columns for price, sales volume, BSR ranking, and other metrics. The interface is designed to help users narrow down product options based on various criteria.
