Traverse Motorcycle Grips Non Slip Rubber Bar End Thruster Grip

I'm surprised how much I like these considering how cheap they are. The clutch side slid on easily and stay in place with some griplock. The throttle side was quite a tight fit and I had to remove the throttle tube so I could put more pressure to get it on, but it went on fine and didn't require any glue on the throttle side. Only thing I had to do was cut holes in the ends to fit the bar ends in. They're nice and grippy, and noticeably thicker than the stock ones which seems to help me with fine throttle control better

Ruckus 02/11/2021

Traverse Motorcycle Grips Non Slip Rubber Bar End Thruster Grip

Totally transformed the Ruckus. Quality grips and look awesome. Wouldn't call this RED it's more a maroon but I prefer it maroon as it's a little classier. If you have a red seat this won't match FYI. Install was easy. Make note of the inner holes as one is larger for the throttle and the smaller one is for the left handle. Cut the old one off and slide the new ones on. I heard some people using hair spray to slide it on but it wasn't needed for mine. Slid right on and rock solid. High quality grips.

Traverse Motorcycle Grips Non Slip Rubber Bar End Thruster Grip

These grips are exactly the style I wanted. The only issues I found were they are an inch shorter than I'd like and they are super tight. I expected them to be the same length as the ones on the bike when the diameters are the same, but they are just a bit short. It doesn't bother me much, just something to be mindful of. Putting them on the bike was a chore. I found using rubbing alcohol and all of my determination was a good solution. Also tried soapy water but that made it hard to hold on to. The other drawback is that they are super tight so it affects the snap back of the throttle. Meaning there is no snap back anymore. It's an older bike so I'm used to it's quirks, but it's another thing to keep in mind.
