Solar energy technology is very flexible: it can be built as distributed generation (located at or near the point of use) or as a central-station utility-scale solar power plant (similar to traditional power plants). Both of these methods can store the energy they produce for distribution after the sun sets, using cutting edge solar + storage technologies.

## The Best Home Solar Company Bakersfield CA and Dallas TX

**Looking at a certain company? We use their products. Looking at a loan? We offer them. Tired of wasting time getting multiple quotes from different companies? Give us a call and let us do the work for you. We'll get a quote from each company you are interested in.**

### Residential

We take care of everything from design and site inspection to sourcing and Solar PV system installation. All you have to do is to answer a few easy questions, sit back, relax and watch it all come together. Avoid constant rate hikes from the utility company. Lock in lower electricity rates for 20+ years and say goodbye to your old electric bill.

### Commercial

Simple Power has been the chosen solar company for commercial solar installations throughout Nevada County. Generous state and federal incentives make commercial solar far more affordable than paying your ever increasing electric bill. Find out how much you could save.
