The E6 technology ecosystem.

IONIC Technology
Bind your own code and behavior requirements to our platform for unprecedented flexibility and customization.

C4 Data Access
Our NoSQL DB system transforms data and reporting capabilities with instant insights into your products and easy integration into backend BI, CRM and reporting tools.

TRITIUM® Platform
E6's portable, extensible, platform featuring 550+ APIs with a single code base that can be used to create and customize almost any imaginable consumer or commercial product use case.

VERTICES Structuring
Our industry first many-to-many account structuring system that allows you to stack, build and manage digital accounts in any configuration.

Where we've been.

JUL 2017
E6 opens in Tokyo

NOV 2018
HSBC and JAL launch consumer products using the Tritium platform

AUG 2019
E6 opens in London and Singapore

NOV 2019
E6 announces IONIC Technology, clients can add their code to the system and Vertices allow for graph account structures

Leapfrog technology limitations so you are free to innovate

E6 SOLUTIONS	SATISFIED E6 CLIENTS

E6 SOLUTIONS

- 550+ RESTful API; extensive capabilities
- Orthogonal architecture & IONIC technology; maximum ongoing flexibility
- Simple implementation and deployment
- Global solution; use anywhere in the world
- Real time data access, product monitoring & enhancements
- Sophisticated security architecture; highest industry standards; PCI DSS ready

SATISFIED E6 CLIENTS

- Differentiated, customized products
- Ongoing innovation
- Speed to market
- Global unifying solution
- Customer engagement; value creation

Unique differentiators

- Just In Time payments (quantitative authorization) allows to perform real time top-up from external sources during transaction processing resulting in higher approval rate.

- QuickSpend* feature allows for seamless purchased with e.g. non-fiat units

- E6 IONIC technology & plug-in mechanism allows clients to bind their own code and behavior into Tritium® readily. This allows E6 clients to quickly respond and adapt when there are shifts in market demand, benefiting from unprecedented flexibility and innovation in creating state-of-the-art, customer centric products.

- Extensive set of risk configuration available - risk engine authorizing/blocking trnx based on preset rules

- Program management dashboard; real time product monitoring & enhancements

- Can enable value added services:

  - Instant earn and burn of reward units (e.g. points, miles etc.) in real-time

  - Configurable calculations for earning and redemption of reward units down to individual customer

  - Full variability and configurability around earning and redemption of reward units: extensive ruleset allows the business to manage and change in real-time
