# WORLD'S FIRST AUTOMATIC TOOTHBRUSH THAT BRUSHES YOUR TEETH IN 30 SECONDS.

**Toothbrushes** have been around for centuries.

But over the last 30 years they have barely improved and that's  
also why our **far more harmful, habitual problems still  
persist.**

Brushing too hard, not long enough or only once a day, not  
flossing or replacing your brush, and skipping the dentist are  
often ignored issues. **Yet, they have a big impact on oral  
health and outward appearance.**

This is why we invented **Myst.**

## MEET THE MYST

**Let's face it: brushing your teeth is not exactly the sexiest thing on Earth.** You have to squeeze, scrub, gargle, spit, rinse and floss every morning and evening, every day of your life. Many of us hate brushing our teeth so much that we avoid doing so whenever possible—even though we know we shouldn't...

**Myst was created with a single goal:** to make toothbrushing quicker, automatic, and more efficient. The Myst features the latest innovation in dental technology and gives you daily access to automatic, dental-grade cleaning.

If you brush your teeth for the recommended **120 seconds with a regular toothbrush** every surface gets brushed for just 1.25 seconds (given the fact that you have 32 teeth and every tooth has three surfaces).

Myst brushes all your surfaces for the whole 30 seconds. This means: **every tooth surface gets brushed 8x longer and the total toothbrushing duration is 12x quicker.**
