

ORAL-SYSTEMIC HEALTH

TESTING STARTS IN THE MOUTH

[Learn More]

WHAT IS ORAL-SYSTEMIC HEALTH?

"The mouth is the gateway to the body. Plain and simple, many chronic conditions and illnesses first show symptoms in the mouth. The oral-systemic link focuses on detecting, preventing, and treating conditions and illnesses including heart disease, sleep disorders, diabetes, periodontal disease, and more. This can be done by educating dentists and physicians and encouraging them to collaborate to cure."

American Academy of Oral-Systemic Health

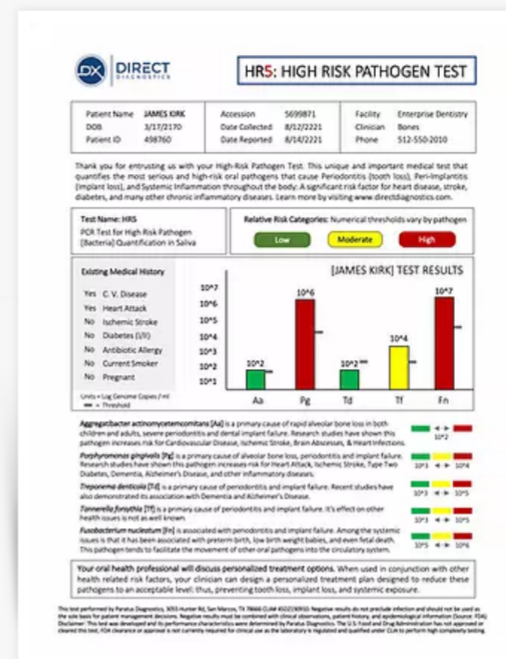

OUR SOLUTION

HR5™

High Risk Pathogen Test

Just 1ml of saliva and we deliver highly quantitative results on the five bacteria considered to be the highest risk pathogens for periodontitis, peri-implantitis, and systemic inflammation: Aa, Pg, Td, Tf, & Fn.

HR5 was born out of years of research, numerous scientific publications, and decades of clinical experience by our expanding team of partners.

10 Reasons To Use Our Test

- Focused
- Affordable
- Accurate
- Quantitative
- Patient Friendly
- Provider Friendly
- Easy to Read
- Fast Turnaround
- User-friendly Software
- Saliva (just saliva)

EDUCATION & INSIGHT

The future of Oral Systemic Health resides in both patient and clinician education. While testing, treatment, and best practices are evolving rapidly, we have partnered with the following organizations to help bring this emerging field to life.

After years of outreach, Oral-Systemic Health has moved beyond dentistry and is now an active discussion across specialties including cardiovascular, neurological, obstetrics, anti-aging, and beyond. Explore the resources below and join us in changing lives.

We look forward to meeting you at an upcoming event or conference. Reach out below to learn more or schedule an introductory call.
