

A.I.R.E. Sessions

Our A.I.R.E. Institute sessions sessions can be modified as a single training to suit a variety of scheduling and other organizational needs. Using evidence based training practices, each individual session is crafted to the role and responsibilities of the participants within an organization, curating a transformative experience that is both relevant and authentic. Participants receive the knowledge and skills to become more self-aware and thoughtfully responsive to acts of inequity. Topics include implicit bias, microaggressions, cross cultural collaboration, and peace-building.
