POWERFUL& PROFESSIONAL: The mixer is professional as your perfect kitchen ally for kneading, frosting, meringue, creamy dressings, baked goods and more. Features a 550W pure copper motor but low noise≤ 72dB, you'll have more time to enjoy baking but not doing!

SLEEK DESIGN: The Tilt-head design mixer allows access to install or uninstall bowl and accessories easily. Lightweight but compact. The electric kitchen stand mixer made of cream white housing and stainless steel make it look more fits sleek & inspiring contemporary kitchen design ideas.

8 SPEED: The kitchen mixer has 8 different speed options plus pulse ranging a slow fold to a frenzied whip. Effortlessly to knead bread and pizza dough, cream butter, mixing cookies, make slim, and more. 5.5Qt largest capacity food processor can meet the different needs of families, parties and gatherings.

CONVINIENT: A protective bowl lid with a wide chute for adding ingredients to prevent splatters and messes! The lock switch will secure the bowl to the base while mixing and non-slip silicone feet keep the dough mixer from rocking.

Nadine Grainger

Powerful blender comparable to my Blendtec

After 5 1/2 years my Blendtec died. Since it was under warranty it was returned for service & will be back in a months time. I could not be without my morning smoothie and needed a powerful comparable blender. The blender needed to mix milk, soft fruit, frozen veggies & frozen fruit without leaving chunks. This blender did it quickly & a bit quieter than the Blendtec. The one drawback was a rubber smell. This is lessening with each use.
