Q What is the difference between the PSX12-06 PX12-06 shredders?

[+ Add your answer](#)

Verified Reply - Staff-Expert

PSX12-06 is best suited for under the desk shredding, while PX12-06 is best placed beside your desk. Thanks for reaching out!

Great large capacity shredder for home office!

I have used this shredder for about a week now for typical home office shredding. While the shredder is slightly bigger than my old one, it packs a much bigger punch, so the size increase is definitely justified. The shredder I tested was the PSX12-06, which can shred up to 12 sheets at one time. In...

Product is frustrating

Have the same issue as another user review, turning on and off is impossible, has a mind of its own

(2) No!

The touch-button that activates the machine from standby is absolutely terrible! Must poke, scrub, pound or coax often to get the thing to work. Machine not much good when it won't turn on....

(5) Excellent quality!

I finally found a paper shredder that can handle more than 3 sheet of paper at a time. The GBC ShredMaster PSX12-06 Cross-Cut Paper Shredder makes getting rid of my sensitive information much easier. I keep it under my desk for easy reach. No paper jams and no problems with 10 or more sheets of paper. It's lightweight, easy to empty the waste paper and operation is simple on the top mount instruction buttons. Excellent!

(5) The BEST Paper Shredder

I have been using the GBC ShredMaster PSX12-06 Cross-Cut Paper Shredder 12 sheets at home and have finally found the best paper shredder. The GBC ShredMaster PSX12-06 Cross-Cut Paper Shredder takes the worry out of throwing away bills or any documents with personal information. Your documents are shredded into tiny pieces of paper and makes it impossible for someone to see your private information. There is a safety guard on the bottom of the shredder to make sure your device is level. There is the wonderful reverse option in case the papers aren't feeding in properly. And this shredder has a wonderful feature where it will go into sleep mode when not in use so you do not have to worry about little hands messing with it and getting hurt or small pieces falling into it causing harm or the shredder to break. I highly recommend the GBC ShredMaster PSX12-06 Cross-Cut Paper Shredder. It is a fantastic paper shredder with safety features that cannot be beat and shreds into the tiniest pieces of paper. And you can shred up to 12 pieces of paper at a time.

(4) I would definitely by this product

This is an excellent paper shredder. I used it to shred my important papers that were no longer needed but yet I did not want people to see my info in a trash bag. It shreds very well. No issues with jams or anything of that nature. This is perfect for all your documents and such that u have stored forever and need to get rid of. I only wish it could shred a larger amount at a time or plastic cards! It is very easy to use and with just a touch of a button you are in your way to shredding your paper. Easy to use and easy to store. This is a great product and does exactly what it says.

Ready to shred

(5) I would buy this product again and again

I liked the shredder. It get over heated bed fast. But for all it worth i enjoy shredding up my papers that i don't need or want anymore.

(5) Works great!

This shredder worked great for my home needs. It chops it up nice and small and I feel comfortable using it for my personal paperwork. It's compact enough to fit under a desk or somewhere else out of the way. I like that the top is heavy enough to keep my kids from getting into the paper shredding.

(5) Great large capacity shredder for home office!

I have used this shredder for about a week now for typical home office shredding. While the shredder is slightly bigger than my old one, it packs a much bigger punch, so the size increase is definitely justified. The shredder I tested was the PSX12-06, which can shred up to 12 sheets at one time. In the video attached to this review, 7 thicker sheets of paper were used and as you can see, the shredder handled it with ease. No jams and it shredded quickly. Pros: 1. "Warning" light shows if the shredder is left on - this is a great safety feature that is important for me because I have 2 small kids and while I always try to ensure that the shredder is turned off (and/or unplugged) when I am done using it, it is nice to know there is a backup plan to ensure the shredder doesn't stay on and cause any accidents 2. Quick and efficient shredding 3. Cross cutting pattern insures document security 4. Not too loud 5. Larger capacity Cons: 1. The only con I see with this shredder is that it does not shred credit cards. While the number of credit cards I need to shred is minimal, other shredders I have had in the past have offered that as an option. With it being a larger 12-sheet capacity, I would think that the shredder should have that capability to shred at least one card at a time. Again, this is a minor detail and is the only issue I see with the shredder. While I was not aware of the GBC ShredMaster PSX12-06 Cross-Cut Paper Shredder before participating in the program, after receiving it to test out, I can say with confidence that I would buy it and I would also recommend it to others.
