Can't beat the price. It has all the features needed

Reviewed in the United States on December 31, 2020

Verified Purchase

This is my second home device for measuring blood pressure. I bought OMRON a few years ago for my husband who has high blood pressure and I paid \$70 for it. However, the cuff on OMRON is now a little too small *it is also stiff) so I finally decided to get something different. As you can see in the photos, Anmeate is much smaller than OMRON and a nice cloth bag is included, which makes it very portable. Four AAA batteries were included (bonus) so I was able to test it right away. Anmeate has a longer than OMRON (up to almost 19"), soft cuff. There is an option to switch between two profiles and store up to 99 readings. Color coding for blood pressure (BP) zones makes it easy to distinguish between normal and high BP values without a need to remember the reference values. I would definitely recommend this product. You can't beat this price and you get everything that a blood pressure device can have.

BP Monitor - upper arm one from Anmeate - Loved it and awesome !!!

Reviewed in the United States on January 3, 2021

Verified Purchase

From long time i am tired with wrist one to get good results. I been recommended by my doctor to monitor my bp and wrist one is little harder. I was planning to get one with upper arm one. I do not know much about this brand Anmeate, but when i looked the features and convenience i thought I can give a try. Features i liked are big display feature and color display depending upon reading and numbers are big and also supports for 2 people. I liked it. when i looked more detail it also has usb c port for alternate power than battery and thought that was good so if my batteries are not available for some reason or in home i can use more usb c which is easily available. but color, big numbers and 2 people are main key things i liked. After receiving when i opened i liked the pouch and quality of its make and buttons. Tested multiple times and few days here and there to see the reading, it shows the bp reading to what i been felt at that time like green, orange and red to notify. I also tried to

use usb-c charging cable to use the machine and it worked great with the batteries and w/o batteries that is perfectly awesome. As it needs more air to pump to upper arm, usb-c port is unique and i loved that one. Thanks for the people who are behind this product, did the

My mom is Hospice. I ordered this product to monitor her blood pressure (it gets very very low.)

It is extremely accurate. I tried it on myself before her and both reading were spot on. It has large screen so it's easy to read. Very easy to take. And the cuff is large enough for larger arms as well as smaller.

I am extremely impressed with this product!

Very easy to use

Reviewed in the United States on December 29, 2020

Verified Purchase

This cuff is easy to put on and the visuals on the cuff itself helps to accurately place the cuff on your arm. The display when the BP is read has a color code. Green-Normal, Yellow-Border line and Red-High. The carrying bag is just the right size to fit it all. Easy to read instructions. Very good product!

SW

Easy to use, great display

Reviewed in the United States on January 4, 2021

Verified Purchase

I bought this arm blood pressure monitor as a gift for my dad who has high blood pressure. Once international travel restrictions ease up I'll be able to take it to him and test as well. While I can't tell how accurate the monitor is for sure, I tried it out on myself and the readings were definitely in line with my normal blood pressure (usually on the low side). The cuff worked fine even on my skinny arm. I am pleased to report that it is easy to operate, the display is large and clear. It also shows the battery life at the bottom which is useful. It packs up nice in a little carry bag included.

Accurate and easy to read.

Reviewed in the United States on January 7, 2021

Verified Purchase

I have a wrist blood pressure monitor that I've questioned the accuracy of for a while now. I got this hoping it would be better and it is. It's not the easiest thing to put on with one hand but far easier than any other I've tried. It's the nature of putting something on one handed.

The display is large and easy to read. The memory can store a lot of readings. The device also comes with a velveteen bag to keep it safe. Overall I'm very pleased with this blood pressure monitor.

It seems to work

Reviewed in the United States on February 5, 2021

Verified Purchase

I know what my blood pressure should be since it has been the same for decades. This thing seems to accurately reflect my blood. I have taken it upon waking, after a heavy workout, and just in the middle of the day. The results seem to accurately reflect the various changes during the day. My wife has used it and she gets the same consistent results.

It is easy to set up, easy to use, and easy to read.

One thing I note is that we have only had it about one week and the battery is at 70%. So, it might use a lot of batteries. However, since it is new we have over-used it. Used once or twice per day would be less drain on the battery.

Seems to be a very well made product and easy to use.

Reviewed in the United States on January 21, 2021

Verified Purchase

Pretty easy to set up and use. I would recommend reading the full instructions for use rather than relying on the included "Quick Startup Guide" since that leaves out some key details to ensure a correct reading. I can't yet speak for its accuracy, but it seems slightly higher than what I'm used to getting, but that could be because I've been more of a couch potato lately. I'll find out next week when I have a doctor appointment where I can get a comparison to the reading they take there. It uses 4 AAA batteries (included!), not sure how long they will last, but it has an option to connect external power to it via a USB Type C charger (not included). Overall, I would definitely recommend this BP meter to keep frequent track of your BP at home.
