

Intelligent Healthcare IT Automation

SureTest gives you the power to transform your entire EHR and related system testing process and redeem thousands of staff hours every year. This is truly a turnkey test automation solution.

It's based on our rigorous expert methodology and combines SureWorks, the most extensive, constantly updated library of test scripts on the planet, with the SurePersona Engine. This powerful tool precisely emulates your end-user experiences and validates workflow integrity so quickly it will revolutionize your entire approach to system upgrades and new implementations.

We know — every context is different. SureTest's modular framework easily adapts to fit your workflows while ensuring you employ the most up-to-date protocols every time.

Optimize Staff

Free your clinicians and analysts to focus on improving lives. SureTest eliminates up to 80% of the labor spent manually testing your EHR, giving your staff back thousands of hours every year that they can dedicate to other strategic projects and imperatives.

Realize Game-Changing Efficiency

Remove your EHR and related system testing burden with all its pain and expense, and instantly improve the speed and integrity of your processes.

Improve Patient Care

Keep comprehensive testing a priority and maintain the well-being of your community.

SureWorks

LIBRARY

SureWorks is the world's most extensive library of automated test scripts and the linchpin of our test automation solution.

This proprietary resource is constantly updated across various systems and customized to each workflow within your organization's departments..

The scripts are immediately deployed and scheduled at scale to drive automatic, system-wide testing.

SurePersona

ENGINE

This powerful tool emulates the system experience of potential end-users.

It knows exactly which functions and steps each team member needs to employ for each use case and consistently performs the right tasks with astounding speed and precision every time.

SurePersona frees your IT and departmental resources from the time-sucking tedium of testing, allowing them to focus on improving care for your community.

SureMethod

FRAMEWORK

SureMethod is the bedrock for each test automation sequence we deploy.

It's a rigorous framework carefully developed by a team of seasoned healthcare experts certified in all major EHRs and test automation tools.

We've been down the implementation road more times than we can count, and we've seen how testing can make or break a project. Our commitment to this methodology ensures it's done right the first time, leading to long-term system success.

"I've been a strong supporter of test automation for many years. I've attempted to implement Test Automation several times with minimal success, due to the tools' inability to work well with EHRs and the ongoing maintenance of test scripts. They had been extremely resource intensive over the long haul, until SureTest. If the SureTest solution was available when I was a CIO, I would have implemented it immediately, prior to our first go-live or upgrade event."

— David Garrett, Former Health System CIO
