Warning

This scissors are very sharp, proper handling is required to avoid injury and damage.

- 1:** Restrict usage of scissors to hair cutting.
- 2:** Ensure that all hair accessories such as combs and hairpins have been removed from the hair before using the scissors; otherwise. blade could be damaged.
- 3:** Avoid resting your thumb on the finger ring when cutting hair. otherwise, this will result on over-wearing of a specific part(s) of the scissors, and also lead to tenosynovitis in the hand.

Routine Maintenance

- 1:** Wipe all fibers, hair care product residue, and moisture from the scissors after each use.
- 2:** Lubricate the scissors's screw, blade and inner edge daily.
- 3:** Keep the scissors closed when putting them down on the counter or when not in use; blades may become damaged if the scissors are left open
- 4:** Be careful when adjusting the tension, do not over loosen the screw when adjusting it; doing so could compromise the scissors's ability to cut.

Tips: Dedicate a few minutes every day to the maintenance of the scissors and they will remain sharp and efficient for long time.
