Please note this is a product Pre-Order. Zumi is not ready to ship yet. We are in the processes of a launch campaign to raise the funds for the first large scale production run.

We use three main sciences in formulating Zumi; chemistry, computer programming, quantum physics. The chemistry ingredients do two main things, 1. They are “physical” food that provides your body with “physical” health benefits. 2. The other part the “physical” food in the product, allows us to “program” it with frequencies to enhance the product. The base of the science is, “We can’t change matter, but we can change the way matter behaves.” So, basically, two things are happening at the same time, this is what quantum is all about.

For example, one of the ingredients is Ascorbic Acid. By applying our unique technology of programming to the Ascorbic Acid, we can make the Ascorbic Acid vibrate, or behave as if it was Hydrogen. So, basically, the Ascorbic Acid is being two different things at the same time. In the world of chemistry, it is Ascorbic Acid, in the world of quantum physics, it is Hydrogen.

We understand that you may not be familiar with this concept, as it is a very new technology. The end result is that people are getting real results that are very impressive!
