# CHATBOT + LIVE CHAT

No code required, your custom-branded chatbot comes to life, greeting users, scheduling meetings, and routing users to the right members of your team.

BUILD YOUR BOT

Just chat with her. She'll help you build your custom chatbot.

Shall we build a bot?

Chatbots that **LITERALLY** speak to your brand

## YOUR BRAND, YOUR VOICE

### Not your basic bot

BOTS chatbots are customized precisely to your brand. Your colors, your fonts and your voice. *And*, unlike standalone chatbots, our chatbots are customized to **work alongside your team** to lighten their load, aid their everyday tasks and interact with ease.

CUSTOM QUOTE

Deliver **hyper-personalized** customer service like never before by adding a BOTS chatbot to your team.

### Increase Conversions

BOTS chatbots make calls-to-action more engaging, greeting users at their moment of intent and walking them through every step of the process.

### Build Customer Relationships

BOTS chatbots build rich profiles on your users so that your agents can step into a chat at any time and pick up where they or the chatbot left off.

### Reduce Support Costs

Let BOTS chatbots handle the easy questions, freeing up your staff to field the more pressing and challenging calls.

## What can our chatbots handle?

### Screen & Filter Incoming Queries

Save time by letting chatbots screen incoming traffic, answering the easy questions and routing the more challenging or high priority visitors to the right member of your team based.

### Sell Products and Handle Invoices, Subscriptions and Payments

We'll train your chatbot to be fully informed on your products and offerings, and even integrate it with your POS to enable it to sell products and handle billing.

### Recruit, Identify and Hire Talent

Our team specializes in training chatbots to speak intelligently on your brand, including answering questions about current openings, hiring practices, corporate culture, and more.

### 360 Profile of Your Visitors

Our chatbots are designed to capture visitor data and provide a

### nimbus screenshot app print

Our chatbots are designed to engage your users, and session-to-session recall means the chatbot picks up where it left off when a visitor returns, providing your team with deep intel and full profile views of your visitors like never before.

### Guide Users Through Platforms & Software

Make any software or application easy to use by training your chatbot on it first. The chatbot remains at your user's side, guiding them, answering questions, alerting a team member if more assistance is needed.

### Train Staff

Documents, policies, procedures - bots are great for digesting tremendous amounts of intel and turning them into conversations. Let our team brainstorm the best way to make your company's knowledge base more accessible to your team.

MORE FEATURES >

## Want the **crème de la crème** of all chatbots? We've got you.

Our team of scriptwriters analyze your content and turn it into robust, conversational scripts that convert your website traffic into warm leads through guided conversations and intentional followups.
