

Autism and Behavior Services

Personalized ABA programs designed to improve the quality of families with children experiencing behavioral challenges

Our Approach

We help families with children who are experiencing challenges related to a diagnosis of autism, developmental delay, ADHD, or behavior disorder. Our team approach to services incorporates the hands on involvement of our BCBAs in all aspects of your child's therapy.

In addition to a BCBA, your child is typically assigned two behavior therapists to purposefully build generalization skills. Behavior therapists are highly trained and heavily supervised in their delivery of ABA services. Additionally, we offer specialized support to parents and caregivers to ensure that you are receiving the help you need to address behaviors and skill development outside of session times.

If you are looking for intellectual/developmental disability services funded by the Medicaid Waiver, please visit our ID/DD services page here.

In-Home ABA

We work with your child (ages 1-21) and your family to provide applied behavior analysis (ABA) services in your home to ... [More >](#)

Therapy and Education Center

At the Dominion ABA Therapy and Education Center, we offer an array of educational services for both preschool and school-age individuals with autism and related disorders. In affiliation with Dominion Academy, we are licensed by the Virginia Department of Education and accredited by the Virginia Association of Independent Special Education Facilities. Our preschool program provides your child a play-based ABA curriculum designed for children ages 2-6. Our school age program provides your child with academically-based individualized ABA curriculum designed for children ages 6-22.

Individualized instruction is provided in a variety of settings by behavior therapists supervised by a BCBA and a licensed special education teacher. Each child receives intensive communication training as well as instruction in social, classroom, and daily living skills. Individualized parent support is provided and wrap around home support is offered for generalization of skills.

Please be sure to fill out the [intake form](#) so that we can serve you as soon as a space becomes available.
