

# the WATERSTATIONS

Our mission is to provide individuals, towns, cities and our whole nation with a healthier and less expensive drinking water delivered through more responsible purification systems that do not damage the environment.

We feel privileged to be on the vanguard of a movement to purify the world's drinking water, which itself is the essence of life.

Our cutting edge technology is redefining how people consume water. You'll find us in grocery stores, convenience stores, offices, and more all over the United States. We are a fast growing manufacturer of amazing water products and we can't wait for you to taste the difference!

## WST-700

A revolutionary vending machine that creates virtual spring water through a natural mineralization process.

The WST-700 is a state-of-the-art water dispensing system that purifies drinking water to a very high standard and percolates it through layers of natural minerals to produce a soft, silky water in one, three and five gallon increments.

Brochure

## WST-200

This modern and attractive water cooler is a closed system keeping environmental contaminants out. Cold or hot water is safely dispensed directly to your cup or bottle.

# MANAGING PARTNERS

## RYAN WEAR

Ryan's deep knowledge of the vending machine market is key in the strategic planning and imminent deployment of the WaterStation™.

WaterStation Technology™ promises to be the next generation in water purification and delivery, and Ryan Wear is the business mind behind the movement.

## NICK STREETER

Nick has been hands on with every phase of development, design and sales of the cabinet system that is WaterStation Technology's flagship model, the WST-700™.

He continues to oversee the expansion of the entire WST product line as well as being a major contributor to the overall business strategy.
