What we do

Simple, powerful, apps for your Shopify store

Our aim is to put the power of technology in the hands of small and medium digital commerce owners. We work hard to research, develop and help you get the most out of next generation digital commerce apps to increase productivity and profitability.

Did you know?

Thousands of Shopify stores use the Ablestar Bulk Product Editor to edit over one million products a day.

Bulk Product Editor & Sync

Highly recommended

Not only is this the best bulk product app available in the Shopify store, but the support is absolutely amazing. Two days ago we requested a feature in the software (a new filter for taxable products) and today we received an email from their support to notify us that the feature had been added. That's what we consider to be excellent service. Highly

recommend to other Shopify and Shopify Plus store owners.

From our blog

Launch a Sale with the Bulk Product Editor for Shopify

In this article we'll go through the processes of creating a clearance sale on our Shopify store with our Bulk Product Editor app. We want to offer a 15% discount for all products in the 'Chairs' collection with less than 5 units in stock.
