### **Kebrela tool measuring instruments - Profile Copy Tool with Lock for Carpenter or Handyman - Angle Finder Device for Duplicating Irregular Shape |Great for Woodworking Template, Tiles, Laminate**

Advanced design contour gauge equipment: Only use high-quality materials and designs for engineering design to meet all your scaling and shape replication work! It is made of a durable aluminum core with smooth and adjustable plastic pins that can shape any uneven shape, curb or irregular corners and sides, thereby providing accurate tracking and measurement every time.

Super convenient and functional tool: small and light, easy to carry, multi-purpose. These contour gauge replicators can track and measure irregular contours or edges of objects, such as winding tubes, circular frames, and other irregular objects, and are suitable for molding, woodworking, tile molding, and even car details. It is built with high-precision scales and shaping, with a single needle accuracy as low as 0.05 inches.

Easy to use and 2-sided scale: Once the object has a contour, the contour gauge teeth are locked in place every time to get precise marks. Our profile measurement tool kit will help you easily complete construction work and DIY home repairs, not only to increase your productivity, but also to save time.

Excellent locking and adjustable pin tightness: Unlike other angle rulers and contour gauges on the market that cannot provide accurate readings and are easy to loose or over-tighten, our Kebrela profiling gauge will provide safe locking and immediate release when shaping the contour Precisely cut templates. Just tighten it to adjust the tightness of the pin, so that you can slide smoothly every time even if there are many templates.

The perfect gift for the handyman in your life: Our profile gauge profile tool is the perfect complement to any man, husband or boyfriend's hardware tool. This contour gauge is an ideal gift for anyone around you, such as carpenters, workers, interior designers, and handymen. This is a birthday or Christmas gift they like to use at home and at work.

### **Product Description**

Contour gauge profile tool adjustable lock, precisely copy Irregular shape duplicator.5" and 10" contour gauge can duplicate any shape instantly and more extensive application.
