### Product Details

#### DESCRIPTION

The iOpener is a tablet opening tool designed to apply heat directly and evenly to case components joined with adhesive. Once the adhesive is softened with heat applied by the iOpener, the adhesive becomes easier to slice with a plastic opening tool or pick.

The iOpener is designed specifically for the iPad, but works with all tablets, smartphones, or other electronics needing heat application in the disassembly process. The iOpener is [heated in your microwave](#). It is reusable, non-toxic, and food safe.

The iOpener is a really nice tool but sometimes it will rupture, have to be careful handling it. Overall a good tool.

iOpener did not heat up enough to heat the adhesive on the back cover of my Samsung S10. Had to use a hair dryer instead. The rest of the kit was incredibly useful.
