THE EVOLUTION OF ANTITRUST IN THE DIGITAL ERA: Essays on Competition Policy

Volumes 1 & 2

Editors
David S. Evans
Allan Fels AO
Catherine Tucker

Summary

Each author in these two collections of essays tackles the overarching themes of digital markets from their unique national perspective. The issues they cover are many: the role of innovation, the conundrum of big data, the evolution of media markets, and the question of whether existing antitrust tools are sufficient to deal with the challenges of digital markets. The resulting tapestry reflects the challenges and opportunities presented by the modern digital era, viewed through the lens of competition enforcement.

Testimonials

Antitrust in the digital economy is the hottest topic at the moment, led by disputes on competition law's ability to deal adequately with digital platforms. The authors of this volume discuss these matters, drawing on their own backgrounds in many disciplines and in many jurisdictions. The result is an invaluable collection of approaches, knowledge, and points of view on the key issues of debate.

Martin Cave

London School of Economics

This international collection of essays is a must read for anyone involved in debates over Big Tech and antitrust reform.

Dan Crane

Professor of Law, University of Michigan

This volume is a veritable feast of articles by some of the most renowned experts in the world exploring the role, the promise, and the limitations of antitrust and regulation in fostering competition and checking abuses in the digital economy. It spreads its wings high and deep, engaging with the disciplines of competition, data protection, privacy, and the media, as applied to subjects of high-tech dominance, data-driven mergers, and algorithm-based cartels. The collection is international, spanning developed and developing economies. The two volumes easily live up to their aim to present state-of-the-art thinking on antitrust in digital markets in jurisdictions around the world.

Eleanor Fox

Professor of Law, New York University

Antitrust Analysis of Platform Markets: Why the Supreme Court Got It Right in *American Express*

Competition Policy in Asia: Essays on Recent Development

Media Markets and Competition Law: Multinational Perspectives

Internet: Competition and Regulation of Online Platforms

The rise of the digital economy strengthens the need to understand the workings of digital markets and to verify the suitability of our regulatory tools to ensure that welfare is enhanced. This most welcome collection of essays by leading thinkers, academics, and enforcers from all over the world, significantly contributes to this goal: it offers thoughtful and highly interesting analyses of some of the most important cutting-edge challenges to the application of competition law in the digital economy, and suggests thought-provoking solutions. Issues covered include, inter alia, algorithmic coordination, two-sided markets, self-preferencing, data portability, and significant bargaining power.

Prof. Michal Gal

University of Haifa Faculty of Law, and President of ASCOLA

The latest CPI book brings together a unique combination of fresh antitrust perspectives on all things digital. It gives a first account of developments in jurisdictions which have positioned themselves at the forefront of competition law experimentation, including Australia, Germany, and India. A great source of insight into the risks and opportunities of policy innovation in environments of deep uncertainty.

Nicolas Petit

Chair in European Competition Law, European University Institute

This is a timely and useful resource on one of the most important issues facing competition law practitioners today, with a diverse collection of essays from some of the thought leaders on the topic. It is instructive to see how the issues are being approached in a variety of jurisdictions around the world and many of the takeaways have global application.

Brent Snyder

Chief Executive Officer, Hong Kong Competition Commission

This book collects insights by many of the world's leading practitioners and academics on critical important topics involving competition in digital issues. Given the number of jurisdictions covered, these essays provide much needed guidance on developments around the world.

D. Daniel Sokol

Professor, University of Florida Levin College of Law
