DEDICATED, EXPERT-LEVEL SUPPORT

A dedicated support team that stays with your organization from requirements gathering to product launch and beyond

Transforming the Product Not the Process

No two accrediting processes are the same. While most software requires you to change how your accreditation process works to adapt to the confines of its architecture, VA's Jetpack solution is the exact opposite. You'll never have to sacrifice your process or data to achieve your end goal. Jetpack was developed explicitly for accreditors in order to streamline and simplify the accreditation process.

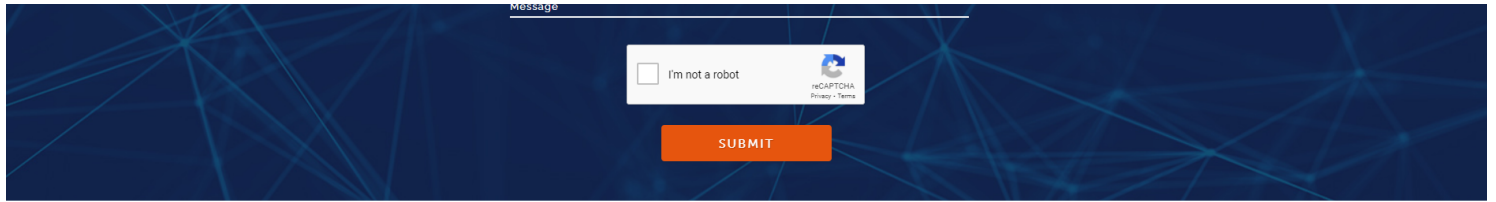

Jetpack is modularly constructed as a series of building blocks on a firm foundation, allowing you to change all the doors, windows, and rooms in whatever configuration you want while the foundation remains rock solid. Jetpack can be configured in any way possible without breaking or destroying its core functionality, whether those configurations come at the beginning of implementation or as upgrades, enhancements, or VA's future releases.

Continually Anticipating Accreditation Needs

Working with accreditors and learning their individual processes has given us a leg-up in the software game and driven us to create the most intuitive accreditation management system on the market. With each implementation we add new features and consistently upgrade our clients, at no additional cost. Your installation of Jetpack will always be the latest, greatest version and will include functionality that you didn't know you needed but are so glad is there.

You need product support that not only handles bug fixes and updates, but operates as your extended technical team, mentoring and coaching you on how best to utilize the Jetpack software for your accreditation process. We offer the kind of support that makes an impact: knowledgeable, reliable, and steadfast in our commitment to you, your organization, and your accreditation process.

Dedicated Support the Way You Need It

An Inclusive and Scalable Platform

Responsive Architecture

Fully accessible from popular devices and operating systems.

Information Management

Organizations/Institutions can easily input, update, and upload information on an ongoing basis.

Bungee Integration

Easily integrate with Bungee to readily access your organization's data and surveys.

Dynamic Reporting

College/School users can produce and save graphical data reports.

Self-Study Management

Build, create, manage, edit all aspects of a self-study on an ongoing basis.

Benchmark Reporting

Filter data and run descriptive statistics for benchmark reports of institution, peer, and national data.

Self-Study Report Management

Create, update, and submit online self-study reports and other custom accreditation reports with controlled access.

Access Management

Set up and manage appropriate access hierarchy for each institution. Keep a record of every organization that you accredit or have a relationship with, including key contacts, accreditation history, custom fields, and much more.

Self-Study Import

Map legacy data to the online system. Once imported, you can access the historical data from the same dashboard.

Automatic User Sign-up, Approval Management & Intelligent Funneling

Users can sign up automatically. Their request will be routed to the proper approver with oversight.

Email Messaging

Send one or mass emails to users in the system. This includes template management, personalized email account integration, and tracking.

Conflict-of-Interest Management

Get alerts and notifications when the system detects conflicts-of-interest.

Letters & Certification Management

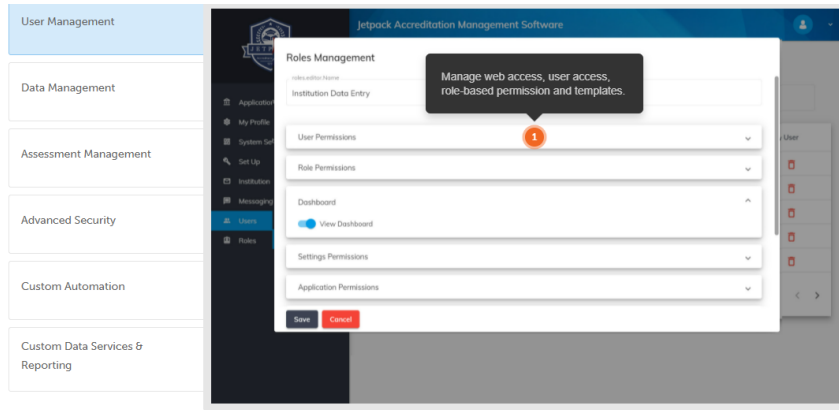

Create, manage, and issue official letters and certificates.

Calendar & Visit Management

Plan your onsite or virtual visit and manage all aspects of accreditation deadlines in one master calendar view.

Extensive Management and Configurable Features

What Our Clients Are Saying

“ I have been fortunate to have worked with Virtual Atlantic for 5 years and counting. They are an extremely talented group and have always met our vision. I look forward to our continued relationship in the years to come.

- Major Jonathan Quigley, RCTA

“ VA's Team360 Enterprise has been an integral part to our development success. Their developers are sharp and the support staff is wonderful. It's an irreplaceable resource for growing and established businesses.

- Colton Carnevale, COO, FAST Graphs, Inc.

“ Throughout our project I was very impressed with the skill sets on their team, as well as the manner in which they communicated. Not only were they professional and timely, but their direction helped us create a well-designed and highly functional website on a tight deadline.

- Carolyn Conlon, Assistant Director of Marketing, Reynolds Community College
