Description

1. The hook tip is repeatedly flattened to ensure that the hook tip remains sharp.
2. The hook and handle are symmetrical and the bow is smooth, so the line will not be scratched when catching fish.
3. The barb reduces the chance of disconnecting from the hook, and is a great tool for anglers to catch big fish.
4. In order to prevent the hook from being straightened or broken after catching a big fish, precise flattening treatment is carried out according to the degree of bending of different configurations to ensure the hardness and strength of the hook.
5. Super sharp and durable, made of high-quality materials, the handle head has a certain thickness, and the hook is not easy to break.
6. It can make the bait stronger and not easy to fall off.
7. Note: The hook is very sharp and should be used with care. Don't put them where children can reach them.
