outdoor camping portable gas stove we produce and sell has passed CSA safety certification, which is very consistent with the safety requirements of North America. Built in pressure sensor protection can cut off the gas flow mechanism once over gas pressure. Piezoelectric ignition, automatic safety switch and gas leakage protection device are available. With these safety protection above, you can purchase and use our stove without hesitation.

DUAL FUEL DESIGN - The dual fuel single burner gas stove is compatible with both propane (fuel not included) and butane (fuel not included), operates on a single butane canister 8 oz or a propane canister 16.4 oz. Dual fuel is more practical and can be used in a variety of situations. It's a good partner for your outdoor camping and home emergency.

7,200BTU/HR HEAT OUTPUT - This camping stove has enough heat output to help you solve cooking problems. Ideal for camping, outdoor cooking, rv travel, bbq, home emergency kit, etc. Your best choice for emergency cooking preparedness toolkit.

PROPANE CONVERTER REGULATOR INCLUDED - Coming with propane converter regulator, allow connecting to an 1 pound propane tank. No need to buy other accessories yourself. (For your safety, leakage test is required before use.)

EASY TO USE & CLEAN - For your safety, please install and use under the instruction of the manual. The portable gas stove built in a piezo auto ignition feature, no need to use traditional matches or lighters. Lock the gas canister position and turn the control knob to the end with a click voice. Easy to use, and suitable for any outdoor settings. Easy to clean up enamel surface and dripping tray, only needs a little water to clean it.
