Mirifrige Drinking straws, Reusable Glass Straws, Drinking Staws with Cleaning Brush

- Crafted out of the finest all borosilicate glass, lead-free, no metal aftertaste, plastic free, BPA free, As a safe and suitable alternative to plastic, these are safer for the environment. Eco-friendly packaging, no plastic.
- These straws are perfect for a wide variety of hot and cold drinks: smoothies, fruit juices, slushies, milkshakes, bubble tea, hot chocolate, cocktails and even cappuccinos or specialty coffee. Sip in style with these glass straws that are great for any occasion.
- These straws can easily fit through the lid slot of your mason jar, tervis tumbler, glass tumbler etc.
- Each straw is handmade in our studio by glass artists and inspected by hand for quality. Easy to clean and dishwasher safe.

- This glass straws set makes a great gift for those who enjoy drinking & care for the environment.

Product information

Durable / Safe

Only the best borosilicate glass is used for our straws. While free from impurities and cloudiness, it is also more durable than normal glass straws. With 2 mm thick glass, we made almost the thickest glass straws which means more durable and more safe for the old and the kids. You will never worry about it breaking during use and even with a small bump, it will keep perfect.

Resist Heat / Cold

Borosilicate glass is well known for having very low thermal expansion, making it resistant to thermal shock, more so than any other common glass. The maximum thermal shock range (the difference in temperatures it can withstand) of borosilicate glass is 170°C. This is why you can take straws out from the oven and run cold water over it without shattering the glass.

Non Toxic / BPA Free

Mirifridge glass straws are BPA FREE and don't leach toxins into your food as you drink. They are very safe and no worry about your healthy. Each time you use your glass straw equals one less plastic straw ending up in your landfill. One glass straw replaces thousands of plastic straws.
