ZipX™

ZipXSynch™

Danger Improperly installed electrical wiring can be dangerous and cause fires. Consult building codes or a licensed professional before doing any electrical work. Keep out of the reach of children and pets.

Installation according to installation instructions:

1. Strip the wires to be joined to the proper length and twist them together.
2. Attach the wire connectors to the wires following the wire connectors installation guide. Ensure that the wire insulation is inside of the wire connectors.
3. Attach the ZipXSynch wire cinch over the wire connectors.
4. Install a wire tie over the wires and the tail of the ZipXsynch. Tighten the wire tie and place the wire connectors and ZipXsynch in the junction box.
