This little toy is very simple to install. The bottom is a tumbler, and there are two small balls in the middle. The cat likes to buckle the two small balls in the middle. At first, he was curious and didn't dare to touch it. It's so cute to play with, our little cutie is too skinny. Many of the toys we bought for him are broken by it. I don't know how long I can play.

This revolving windmill is very well designed and fits the cat's playfulness. After buying it home and disassembling it, the cat leaned in immediately. The first thing I smell is catnip. I have been dipping, and I smelled it drooling!

It's not fun to let the Mao child speak with the actual action of play. As a result, he still likes to play with this toy very much. The tumbler is in the form of a solid material and has no peculiar smell. The cat child will play for a long time. recommend
