Who is Skydas?

We are a Kydex thermoforming company comprised of ex-military, law enforcement, and creatives. We are a group of friends and family working together to create the best products possible. All of our products are made by hand and inspected before they leave the door. Our current offerings are constantly being improved and new products are being added as we perfect our new creations.

When it comes to holsters, we offer two universal styles. Both styles allow for RMR optic attachments.
