Description Reviews(2)

Electric coffee grinders can crush coffee beans under the ceramic grinding core. This process also retains the natural flavor and aroma of coffee better than a blade grinder. The fully automatic system allows for convenient, hands-free grinding. Put this wireless USB rechargeable mini coffee grinder in your bag or suitcase. Whether at home, work, traveling, hiking or camping, you can enjoy freshly ground coffee anytime, anywhere.

Portable Electric coffee grinders have a variety of grinding settings, which can grind coffee beans according to the required brewing method, from espresso to French press, from super fine to super coarse.

The detachable ceramic grinding core, hopper and chamber can be easily disassembled and cleaned effortlessly.
