BASELINE

PRIVATE CORPORATE ONLINE COMPLIANCE PORTAL & CALENDAR

OVERSIGHT

Professional Audit:

Annual Compliance Audit and Calendar with ongoing quarterly updates to stay informed.

AWARENESS

Chemical Inventory Management:

Development & Management of geo-coded information and documentation for all necessary materials through private, secure cloud-based management tools, including an interactive map, available to and useful for local emergency response.

REPORTING

- Execution of facility Tier 2
- Coordination with Emergency Services
- Other reporting available*

CONSULTATION

Clients receive up to 120 staff consultation hours.

BASELINE +

This service offering includes all of the **BASELINE** services, PLUS:

INTEGRATED PRODUCTION TRACKING

Real Time Track:

A mobile-device ready application that will track materials as they move through your facility, as well as throughput. Your EHS managers and teams will have the ability to monitor usage, along with various key parameters including:

- VOC and HAPs Content;
- Properties such as Density;
- Hazard/Waste Category; and,
- Regulated Constituent Chemicals.

Real time track will allow for hyper accurate TRI, NESHAP, Air Permit reporting, and coverage for unannounced regulatory inspections.

BASELINE STEALTH

In addition to SESCO's **BASELINE** products, **BASELINE STEALTH** includes oversight by a SESCO approved environmental or corporate attorney. This creates confidentiality that is normally covered by Attorney/Client Privilege.

ALA CARTE ITEMS*

Development, execution, and maintenance of facility compliance related applications, reports and plans, using baseline tools and methodologies, including:

- Air Permit Applications and Reports;
- Storm Water Plans (SWP3) and Inspections,
- Oil Spill Plans (SPCC);
- Toxic Release Inventory (TRI);
- Emission Inventories (EIs); and,
- Pollution Prevention (P2) Plans.

*Discounted with **BASELINE** agreements.
