## BASELINE+

---

This service offering includes all of the BASELINE services, **plus**:

### Integrated Production Tracking

**Real Time Track:** A mobile-device ready application that will track materials as they move through your facility, as well as throughout. Your EHS managers and teams will have the ability to monitor usage, along with various key parameters, including:

- VOC and HAPs Content
- Properties such as Density
- Hazard/Waste Category
- Regulated Constituent Chemicals

Real Time Track will allow for hyper-accurate TRI, NESHAP, Air Permit reporting, and enhanced coverage for unannounced regulatory inspections.

## BASELINE Stealth

---

In addition to SESCO's BASELINE products, BASELINE STEALTH includes oversight by SESCO approved environmental or corporate attorney. This creates confidentiality that is normally covered by Attorney/Client Privilege.
