- Dental Surgery
- Cosmetic Surgery
- Carpal Tunnel
- Surgery
- Pain Injections
- Biopsies
- Laparoscopic
- Sinus
- Reconstruction
- Shoulder Procedures
- Urology
- Soft tissue repair

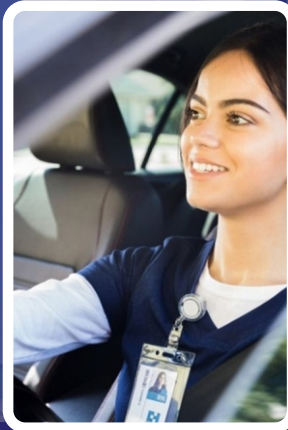

Most patients learn last minute that facilities will not perform surgery if family or reliable transportation is not pre-planned.

Amera assists patients and facilities needing reliable medical transportation from ambulatory day surgeries.

What is Ambulatory Day Surgery Transportation

Some medical appointments require patients to be signed out and driven home by someone other than themselves.

Many other services can't provide this.

why Amera is the safer alternative.

CNAs can assist with discharge from the ambulatory surgical center, assist patients into the car and drive patients safely back home.

It's not ride sharing...
it's ride caring.
