0 votes  
**Question:** My ipad will only pair with one bluetooth device at a time. do both the speed and cadence sensors centralize into one bluetooth data stream.  
**Answer:**

Dear James , It up to your app.If you use Wahoo or Cateye app,you could connect with our DreamSport speed and cadence sensors together.Tks in advance.  
 By Dream Sport **SELLER** on November 18, 2021

**Question:** Will updates be made available for these sensors as compatible apps are updated?

0 votes  
**Answer:** Dear Shirley,our DREAM SPORT sensor will updates be made available for these sensors as compatible apps are updated.Tks in advance.

0 votes  
**Question:** Thanks for the update. Which is the best app to use with the sensors that are free.

0 votes  
**Answer:**

Dear Natasha ,  
 Nice to hear from you. The speed sensor and cadence sensor are specially designed for spin bike. They transmit data via Bluetooth and ANT+ technology, so it is suitable for 50+ APP on your phone. If you are testing this type for the first time, you can consider wahoo app which reviewers using in the revi... [see more](#)

#### Good Cadence

Reviewed in the United States on November 28, 2021

Style Name: Cadence Sensor [Verified Purchase](#)

This cadence sensor replaced my Wahoo sensor, because it fell off. I never liked it rubber holder but put up with it until it left the crank arm. This new sensor fits very well and looks sturdy. I've been using it for months now, and it performs flawlessly.

One thing I like about it is battery replacement. It's easy to take off the compartment cover compared to the wahoo. Seems like Wahoo covers are too hard to remove. I cracked two of them doing it. It's almost like Wahoo wants it that way so you can crack them and buy new ones. I'd take these over Wahoo any day.

#### Updated - Highly recommended

Reviewed in the United States on September 28, 2021

Style Name: Speed Sensor [Verified Purchase](#)

DREAM SPORT has excellent customer service. My first sensor had intermittent connection problems with the wahoo app. DREAM SPORT read my review (below) and reached out to me. After a couple of email exchanges, they sent me a new speed and cadence sensor - both worked as advertised.

Initial Review: Worked amazingly well when I connected to the wahoo app and then it suddenly stopped. The app could see the sensor but it wasn't providing any data. I removed the sensor's battery and it started working again. Now, I have to tap it 2-3X before riding to get it to work.

#### It works as described

Reviewed in the United States on August 26, 2021

Style Name: Speed Sensor [Verified Purchase](#)

Bought this for my husband as he is an avid cyclist. He is happy with the mileage sensor although he feels it's not as precise as the previous ones he owned. It's a decent item for the price.

#### Good computer aid

Reviewed in the United States on January 17, 2021

[Vine Customer Review of Free Product \(What's this?\)](#)

OK ill start off with the solid on this.

Its a good well built small chip that helps you achieve your goals while cycling.

I like it because it can track your progress to make sure that your reaching your best potential.

The design is good and the device pairs up well with your native apps for the most part.

Strava is what I like to use with it and I don't have issues yet.

What I disliked was the (Size) that they offer.

It wasn't clear what I was getting. They offered medium and 10. Reading in the questions forum someone asked the same things and Medium is one sensor (which I got Cadence) and 10 is both sensors.

I think that's a terrible way to separate the two but I hope this helps you make a decision. If I were buying again I would pick up a 10 or both sensors for your bike. I also don't know why they don't let you choose which sensor you will get.

Either way a computer aid like this is a good thing for helping you stay within your goals while getting a good workout.

First Impressions Are Positive Ones

Reviewed in the United States on June 11, 2021

Style Name: Cadence Sensor VINE Customer Review of Free Product (What's this?)

Due to the weather I haven't been able to fully test out this sensor. But first impressions are positive.

Of the Dream Sport set (meaning this item, the cadence sensor, and the HRM chest strap) to me in this day and age of GPS the speed sensor is the least valuable of the three. Cadence sensors remain a must. So the \$29.99 cost (not counting any coupons/discounts on offer) is a sensible price. Let's just hope it stays there (or lower).

Quality of manufacture is excellent (again, especially for the price). (On one hand I wish it came with replacement o-rings, but on the other I guess if your o-ring fails you've already lost the sensor? I usually solve that by using some two-sided foam tape either with or instead of the rubber backing mount.)

No issues with pairing so far (on my Garmin Forerunner/Fenix). I feel confident I'll "pair" with this sensor, as well (and maybe come back for more). Why? Well, I love the Dream Sport HRM chest strap (have two, btw;

BAH VINE VOICE

Very nice and accurate speed sensor. Works great with Ride With GPS/Wahoo.

Reviewed in the United States on May 9, 2021

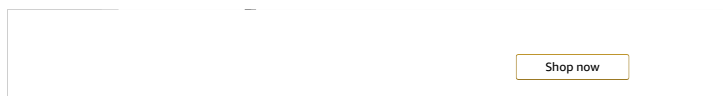

Style Name: Speed Sensor VINE Customer Review of Free Product (What's this?)

I have been using a Cateye wired speed sensor computer and decided to upgrade with the phone cycling app and this speed sensor. I have used phone cycling apps in the past but I always thought the GPS alone tracking to be highly inaccurate (slower and longer riding times) compared to the Cateye wired speed sensor computer so I didn't use it that much. When I use the Dream Sport cycling speed sensor and the phone cycling app, I believe it is far more accurate with the speed and distance than a GPS alone app. It is a huge improvement. I still have my Cateye wired speed sensor computer that has the magnet which calculates with tire rotations and I compared. There is like a 0-1% difference in my distances so it is pretty much identical. Speed is pretty much identical as well but there is like a 1 second delay and that has to do with direct faster wired connection vs bluetooth connection. Not a big deal at all because the reading will still be correct but just with a tad 1 second delay. I used a variety of cycling apps but I prefer Ride With GPS and Wahoo apps. They work great, have a nice clean user interface and track accurately. I also like Samsung Health app with the cycling because I have a Samsung phone. Other consideration is that the bluetooth connection with the speed sensor doesn't interfere or get interfered with my Altec Lansing baby boom
