**it does the job, but that slogan...**

"Powerful Magnets to be a Powerful Man" - this is written right on the wristband. I did not see this before purchasing it so fair warning to all. Suffice to say, if your friends (or a wife who did not buy this for you) see this, a good ribbing will ensue. Other than that, it works well. Solid materials and good overall design. I am getting out the sander to remove the wording...

**So cool and useful**

Reviewed in the United States on November 6, 2020

This wristband is so incredibly useful. For instance, I have been hanging curtains up around the house and I have to get up on a ladder to do that. This way I can have all the screws I need right at hand! Way better than sticking them in my pocket or mouth (ew!) or getting off the ladder to get the next couple. I am really pleased with this wristband.

It was a good stocking stuffer but it is not as hearty looking as the picture indicates. It does fit an adult forearm easily and is well made.

My brother loved this gadget! He wished for it and got it. He says it worked perfectly and held the screwdriver while he fixed the screen door. Best gift for that techie person, that fix-it person or just because it is awesome.

**Hands free tool holder**

Reviewed in the United States on February 27, 2021

Color: Red **Verified Purchase**

Bought this for a male family member. It fits on wrist and user said it doesn't feel that heavy while worn. It is magnetic, hence, Using it for holding small, lightweight items such as nails, screws etc. when doing small projects around the house, looking for that "hands free" experience. Product would not hold a heavier item such as a screwdriver it fell off very easily. It is also easy to knock off the tools attached if you bump it by accident.

My husband said he could REALLY use this. He builds a lot of stuff and the fact he won't have to reach down every five seconds or have something setting atop random things is going to help out tremendously.

**Replace the Magnets and You'll Be Good to Go**

Reviewed in Canada on October 25, 2019

**Verified Purchase**

Out of all the similar products I looked at, this one did seem to be the better choice but like all the others, the magnets are not as strong as I was lead to believe. They can hang on to a few smaller nails and screws, just don't swing your arm too fast.

We ended up taking the original magnets out and replacing them with much stronger ones. It works wonderfully.

And that would be my only complaint. I was pleasantly surprised with the quality considering the price. The band is super comfy, lightweight and not too bulky. The material isn't irritating even after a few hours of wear.

Would be great as is for smaller DIY Projects (hanging pictures, jewelry making, etc.) but I would highly recommend the "upgraded version" for anything more intense haha

**Very handy, slightly large for my wrist**

Reviewed in Canada on October 13, 2020

**Verified Purchase**

This magnetic wristband saved me a lot of time in my recent project, where I had to constantly change between 4 different drill bits with gloved hands. The magnets are really powerful and although I did manage to knock a bit off the band a few times, I soon learned to put the shorter drill bits in the pockets and just leave the 4 inch bit on the outside band. This worked great. The wristband fits but is not quite tight enough on my wrist to prevent turning, so I used it on top of my sweatshirt and then it was great. I will probably add some 'non-slip' material to the inside of the band so I can tighten it a bit 'smaller' on my next project. I am a 5' 9" female but my wrists are not all that beefy. And yes, my wristband has the 'powerful man' writing on the outside. LOL

**Magnets aren't very strong**

Reviewed in Canada on July 15, 2021

Color: Red **Verified Purchase**

I saw some pictures with people magnetizing small hand tools, so I thought this would have reasonably strong magnets. I mean, the product title says "Super Strong Magnets Wrist Tool Holder

with Powerful Magnets" and the description boasts the presence of 15 powerful magnets.

Anyway, when I got it, I tried sticking a screwdriver to the magnets. It... kind of holds. It's more of a balancing act, really. If you move your arm at a normal speed, the screwdriver will fly off and slam into your floor. If you want to test it for yourself, you should probably do it over a carpeted floor so you don't chip your laminate/tiles/whatever.

I wasn't planning to use this to hold screwdrivers and other small hand tools, anyway. It seems to hold screws and other small hardware just fine. I haven't used it on a jobsite yet, but it seems like it should do what it's intended to do. Nobody's gonna have a socket set perfectly lined up on the wristband like the image in the product image for the wristband. Photo based on a random picture of a wristband.
