

Enterprises have thousands to hundreds-of-thousands of unmanaged mission-critical IoT devices all over the world. Leaving them unmanaged presents serious cyber security risks. To safely realize the benefit these IoT devices offer, CISOs need a solution that offers remediation of all types of devices, and specifically Tightly Coupled Devices. The Viakoo Action Platform delivers this solution.

## Securing Tightly Coupled Devices Takes Intelligence

While Viakoo Action Platform can secure any type of IoT device, understanding the difference between Loosely Coupled and Tightly Coupled is critical. Loosely Coupled Devices are related but individual things, like printers, headsets, or monitors. Tightly Coupled Devices
