★★★★☆ **Good massager but...**

Was very excited to try this product out as I've heard so many good things about massagers like this. First impression out of the box, I was impressed. It is very intuitive to use and seem to be quite substantially constructed. I then plugged it in and charged it fully, then tried it out on my wife's shoulders and back. She loved it, I was really surprised at how strong the percussion was. Later that night she offered to rub my back. About 5 minutes into the massage, the gun started rattling inside. I stopped her and checked over the gun changing heads and settings. I gave it back to her and it started rattling like something had come loose inside... It still hits just as hard and though it doesn't best signs of actually coming apart on the outside that I can see, the rattling is quite annoying and seems to be getting louder. My back and here's feels much better for using it; however, I'm just afraid it won't last very long...

★★★★☆ **A warehouse worker's price range in order to relieve that warehouse worker's back.**

This massage gun is efficient when it comes to price but also helping relieve my muscle's fatigue, strains or pains. The gun only reaches a power of 6 levels, it's not very impressive at first but using those 6 levels I successfully relieved my back pain over night. If you need a massage gun to feel relieved and restore yourself for another 10-12hr shift at a warehouse, I recommend this massage gun.

Effective for sore muscles. It could use a better control scheme, but for the cheapest massage gun I found, it does a great job. Really good battery life too.

I received this product in July. Sadly we are in October it stopped working. The company said for this situation they will replace. I'm happy they replaced it however in any situation where the product stops working the company should stand behind there product. It's a good price and worked well.. I use mine daily . Maybe if someone is looking for a product that is not used daily this may be the one for you. It works well easy to use and good price

★★★★☆ **The Power button**

The power button doesn't always recognize that I'm trying to turn it on. Imagine having sore leg muscles, so you turn this on so hard that by the time it turns on, you now have hand cramps. 🤦
