One home for all of your lab's experimental data

No more wasted time spent searching for data.

It's time to put your scientific results and
collaborations front and center.

From raw data to publication-ready plots **in minutes, not weeks**

Turn every experiment into immediate insight. Drag and drop your data into Pluto to view interactive, customizable, high-resolution plots. Pluto supports high-throughput and low-throughput assays, from RNA-seq to animal behavioral studies, and everything in between.

Test your hypotheses **faster**

Pluto brings powerful bioinformatics analysis to every researcher in your lab, right in your browser. Writing your own scripts? You can also export consistently-formatted data or fetch it via the Pluto API for an even deeper exploration.

Securely share results with collaborators.
If you want, **publish them to the world.**

You're in control of your data. Share experiments privately while working on new discoveries, or make them public to benefit science for all.

Compare your results to the latest published
research

Get preliminary data for your next project now,
without running costly experiments.

Analyze thousands of published experiments to
uncover new findings relevant to your research.

Can't find the experiment you're looking for?

Ask us for it. We'll make it available on Pluto.

No one wants to spend hours figuring out how to
analyze data from GEO.

Measure your team's **productivity**

Track and report your lab's progress automatically. Pluto's analytics give you the power to make data-driven decisions to hit your next milestone.

Pluto brings together beautiful design & secure, cloud-based software to create the most intuitive science platform yet.

Pricing

We offer custom plans tailored to your lab's needs:

Explore, for individuals who simply want to explore publicly available data.

Lab, for teams who need one place to manage all of their data, securely.

Enterprise, for organizations ready to accelerate scientific discovery at scale.

Explore Free

Includes:

- ✔ Explore **thousands** of interactive, publicly available experiments
- ✔ Save your favorite experiments for **easy reference** later
- ✔ Free for **everyone**, not just academics

[Sign up free](#)

Lab Customized

All of Explore, plus:

- ✔ Store and manage all of your lab's Projects and Experiments
- ✔ Generate interactive results in minutes, with no coding required
- ✔ Export publication-ready plots
- ✔ Share data **securely** and interactively with your lab mates and collaborators
- ✔ Compare your results against similar published experiments

Schedule a demo

Enterprise Customized

All of Lab, plus:

- ✔ SAML SSO for advanced security within your Organization
- ✔ Teams and roles
- ✔ Administrative dashboard for advanced Project/Grant reporting
- ✔ REST API
- ✔ Integrations
- ✔ And more! Contact us to customize your plan.
