【Double Z-axis center point pull-out structure】 Double guide rail + double screw electric motor, will make the process of printing not only stable but also efficient, and large model printing as firm as the rock, which better solve the nodding effect of the single axis leverage.

【8.9 " 4K high precision, Monochrome LCD screen】 The size of the pixel is 50 microns, with about 9.21 million pixels, which makes the details of the model more realistic and the texture enhanced. The service life is 4 times longer than that of the ordinary color screen, and the service life is not less than 2000 hours.

【Innovative, lightweight charging tray design】 Lightweight design, weight is only 60% of the light laptop. It's easy for you to handle with one hand, not only light but also strong.

【Independently develop the 4th generation of the parallel lamp source architecture】 Compared with the third generation, the 4th generation reduced 30% diffuse reflection. which is beneficial to the recognition of the image boundary. The error value of printing the object is controlled effectively within the scope of 0.05mm.

【Cooling system of high thermal conductivity lamp source】 Combined with large area, heat absorbing base and high conductivity material, the surface area of the heat sink fin is increased by 10%, and the surface temperature is kept low. The service life of the lamp source structure shall not be less than 10000 hours.
