Stop Guessing and Start Testing with HR5

Testing is the first step in early detection and prevention.

DO YOUR PATIENTS HAVE BLEEDING GUMS?

Oral bacteria make their way into the bloodstream and place you at risk.

[View Research](#)

50%
Up to 50% of **heart attacks and strokes** are triggered by oral pathogens.
Source: Circulation (2013)

70%
More likely to develop **Alzheimer's Disease** in people who suffer from gum disease for more than 10 years.
Source: Alz Res Therapy (2017)

7x
Increased risk of **Adverse Pregnancy Outcomes** including preterm birth and low birth weight.
Source: AAOSH

12%
Higher risk of **Premature Death** in women who have a history of periodontal disease.
Source: Journal of the American Heart Association (2017)

up to 50%
Greater risk of developing **Cancer** including oral, esophageal, lung, colorectal, pancreatic, and breast cancers.
Source: AAOSH

95%
of Americans with **Diabetes** also have periodontal disease. Periodontal disease lowers glycemic control.
Source: AAOSH

WHY TEST?

Oral Health:

- Gingivitis: Are your patients bleeding? Testing drives early detection, effective treatment, and prevention.
- Periodontal Disease: Testing drives a medical diagnosis and enables you to develop a personalized treatment plan to clear the infection.
- Restorative care: Testing ensures a clear site for implants and drives better outcomes for restorative work.

Systemic Health:

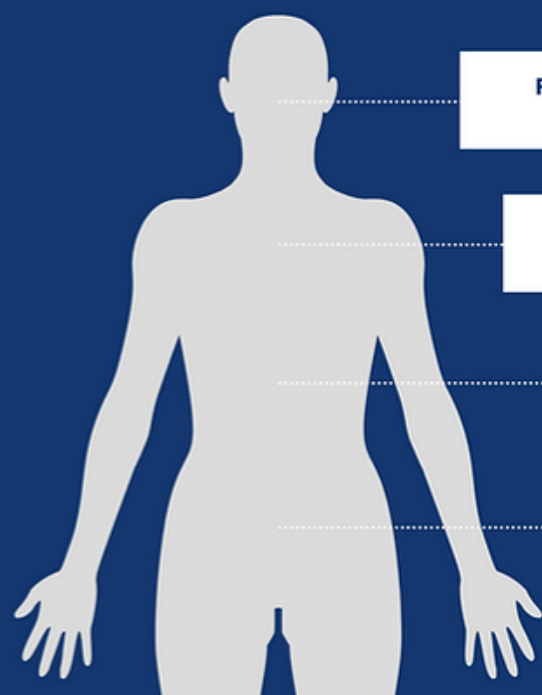

- Irrefutable evidence of link to a growing list of systemic diseases
- Defined connection to Heart Disease and Stroke, High-risk Pregnancy, Alzheimer's, Diabetes
- Testing empowers you to treat your patients holistically and provide true life-saving care

Great For Your Practice:

- For Doctors: Strong economic incentives and increases case acceptance.
- For Hygienists: Improves job satisfaction and drives patient loyalty.
- For the Team: Set yourself apart and deliver the highest level of care.

WHO TO TEST?

Patients with **bleeding while charting or cleaning**

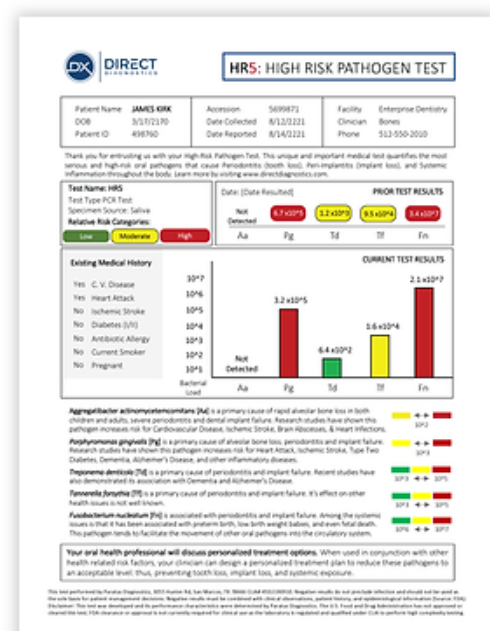

Gingivitis is Pre-clinical Disease

All **perio and restorative care patients (implants pre/post)**

All **pregnant women or those contemplating pregnancy**

Patients **at risk for any of the key Oral Systemic Health diseases:**

Heart Attack, Stroke, Alzheimer's, Dementia, Cancer, Diabetes

HOW TO TEST?

1. Easy to describe, explain, and market to the patient
2. Order via our user-friendly online provider portal
3. Fast medical history checkbox
4. Collect 1ml of patient saliva
5. Place in sealed container
6. Schedule FedEx pick-up
7. Results in 2 days
8. Share results with patients [secure and HIPAA compliant]
9. Implement treatment plan
10. Retest to ensure success

WHY HR5?

The most sensitive, accurate, and affordable test on the market

Our test is backed by science and technical validation

We provide training and resources to build your confidence to test, treat, and clear your patients effectively

Screen. Test. Clear.
