PRODUCT DESCRIPTION

KIKA Breast pumps - Portable Anti-Overflow, Ultra-Quiet and Pain Free Breast Pumps

- **Portable Breast Pump:** Electric breast pumps for breastfeeding allow you to pump breast anytime, anywhere. It provides high-quality, efficient and safe breastfeeding help for mothers and babies.
- **Safe & No Leaks:** Don't worry about potentially harmful substances enter breast milk. Professional reflux design prevents milk from refluxing, only drains the breast milk, and keeps the milk fresh and clean.
- **Adjustable Suction:** 3 Modes (Promote lactation, Massage, Breast Pumping) and 9 levels of suction for each mode, which can be adjusted according to your preferences, imitate the baby's actual sucking frequency and help to suck quickly, comfortably and painlessly. It can easily help you find the right suction power to get more milk in a shorter period of time, giving mothers more choices and comfort.
- **Low Noise & Strong Suction:** Ultra-quiet technology creates a smooth vibration and low noisy atmosphere below 45dB; the max suction power is up to 350mmhg, and the max working time is up to 240 minutes. Electric breast pump provides a comfortable and quiet environment for babies and mothers.

Product Description

Healthy & Safe Material

KIKA Breast Pump is made of Hospital Grade silicone material, all parts are BPA free. ensure the safe breastfeeding for your babies.

USB Interface

USB charging is very convenient, and it can be connected to a computer, adapter, mobile power supply, car charger, etc. Built-in 2300mAh rechargeable battery.

Small Size & Large Capacity

It is small in size, light in weight, and can hold 150 ml of milk. Easily put it in your bag and carry it with you.

Easy to Clean

The milk collector accessories are detachable, which makes cleaning more convenient. Do not insert objects, as this may cause damage. Never clean or disinfect the pump motor.

Accessories

The function of the duckbill valve is to prevent the milk from flowing back and ensure the freshness of the milk. The service life of the duckbill valve is generally about 2-3 months. If it is found that the suction is not good, it will flow back and the milk cannot enter the collector. Generally, the valve is not closed and needs to be replaced.

Accessories Cleaning

The service life of the silicone petal guard and the silicone horn is generally about 6 months. If there is a leak or looseness, it needs to be replaced. Pay special attention to the silicone petal guard. If you don't pay attention to cleaning, it will tear and damage quickly. Do not wash with a hard brush, wash with boiling water for 5 to 8 minutes. It is not recommended to use a dishwasher.
