INTEGRITY MANUAL CONTROLS

Integrity AirMasseur® Controls

BLOWER & CONTROL SYSTEM

Jason's Integrity™ AirMasseur® system includes a quiet 1 HP, variable speed blower with an automatic air heater, electronic control with a 20-minute timer and automatic purge and dry cycle, and a bather friendly air switch activated control button.

BLOWER ON/OFF, SPEED AND SPEED CONTROL

All Jason Integrity™ air baths are provided with an air switch conveniently located for bather operation. This switch controls both the On/Off and blower speed functions. To start and stop the air blower, simply momentarily press and release the air switch button. The blower will always start at its highest speed. Once the blower is On, to decrease or increase air output, depress and hold the control button down until the desired setting is reached, then release.

AUTOMATIC PURGE CYCLE

Fifteen (15) minutes after being stopped, the air blower will automatically start for two (2) minutes to purge and dry the air channel.

AUTOMATIC HEATER

The air heater incorporated in the air blower will automatically operate when the blower is On to help maintain the temperature of the bath water.

Integrity Whirlpool Controls

PUMP & CONTROL SYSTEM

Jason's Integrity™ Whirlpool system includes a quiet 1 HP, single speed pump motor, and a bather-friendly air switch activated control button.

PUMP ON / OFF WHIRLPOOL CONTROL

All Jason Integrity™ Whirlpool baths are provided with an air switch conveniently located for the bather operation. This air switch controls the pump On/Off functions. To start and stop the whirlpool pump, simply momentarily press and release the air switch button.

Quick User Guide

Moved into a new home that features a Jason bath? Missing the owner's manual that came with your bath? We know that there are circumstances where you need immediate help regarding the basic functions of your bath or spa. This Quick User Guide is designed to show you how to identify what type of bath you have based on the type of keypad control that is installed on your bath.

Click on the picture below that matches the control on your bath or spa for user information. Please note that if you have a digital control, as featured in the top row of controls, you must have the bath filled with water to view all available options.
