

TheLogNewsCast Ep. 3: It's Getting Hot in Here: Ocean temperatures are on the rise

Katherine interviewed three experts about a recent study published on Feb. 1 by Plos Climate and written by Kisei R. Tanaka, and Kyle S. Van Houtan found more than half of the planet's ocean surface has regularly surpassed historical extreme heat thresholds starting in 2014. To gain a better understanding Katherine spoke with Dr. Gregory Johnson from the National Oceanic and Atmospheric Association, Anna Marie Laura Director of International Government Relations at Ocean Conservancy, and President and CEO of Aquarium of the Pacific in Long Beach Dr. Peter Kareiva. Each expert brings insight to the study and an in-depth explanation of what the world can expect.
