Excellent compression set resistance for maximum service life and vibration absorption. Long-lasting automotive grade EPDM rubber is preferred by professional installers over PVC/foam seals.

No need to replace this seal every time your cap is removed.

Premium Cap Seal XL dimensions are 2" width x .200" height x 20' length.

For 8ft beds use Premium Cap Seal XL 23ft

Fills small to medium bed rail gaps. Use on truck caps that weigh 200 lbs or less. Seal can be easily cut in half to custom fit pickups with smaller width front bed rails. The two cut seals can also be doubled up to .340" to fill height gaps from the side rails to the front rail. Complete kit includes seal, butyl tape, alcohol pads and detailed instructions for a professional installation.

NOTE: To determine if you need to use a Front Rail Seal 6ft measure the difference in height from the truck's side bed rails (including, if any, bed rail caps) to the truck's front bed rail. If the height of the gap is from .341" to .487" install Front Rail Seal on the cap's front base rail, along with Premium Cap Seal XL 20ft installed on the cap's side base rails. If the height of the gap is extra-large, between .488" to .824" install Front Rail Seal on the truck's front bed rail along with Premium Cap Seal 20ft or 23ft installed on the cap's front and side base rails.

OTHER QUALITY TRUCK CAP SEALS BY Extruded Solutions:

"Super Cap Seal 23ft" measures 1 1/2" wide and fills all bed rail gaps. For caps that weigh 200 lbs or less.

"Super Cap Seal XL 23ft" measures 2 1/8" wide and is for trucks with extra wide bed rails, fills all bed rail gaps. For caps over 200 lbs.

"Ultra Cap Seal 23ft" measures 1 1/2" wide and fills all bed rail gaps. For caps over 200 lbs.

IMPORTANT: To completely seal out dust and water install patented Ultimate Tailgate Seal with Taper Seal® to the tailgate gap and sidewalls, sold separately. Save and buy the COMBO Pack "Premium Cap Seal 23ft and Ultimate Tailgate Seal with Taper Seal®".
