Description Reviews (0)

Durable-These bulbs are an excellent energy-saving alternative to old incandescent bulbs because they have a total life span of 11,000 hours. You no longer need to keep changing bulbs

Energy saving-These LED bulbs require less energy and can save you up to 85% of energy costs. Every daylight bulb can be used as a great replacement for the old 60W incandescent bulb

No warm-up time-These bulbs have no warm-up time. When you flip the switches, they will light up immediately and the daylight colors are stable

Safe for home use-these non-toxic bulbs do not contain mercury and lead. They also do not produce harmful ultraviolet or infrared radiation.

Daylight LED bulbs: Daylight lighting is ideal for task lighting and can help you increase your alertness and work efficiency. This is a good choice for home offices, laundry rooms or kitchens, where daylight can provide better contrast.
