

# Build with what you need when you need it

Scalable AI & Data Science Development Services

## Proving AI solution value

Our customized teams partner alongside in-house product and technology, so startup leaders can design a data science strategy aligned with business plans and customer experience goals.

Through data augmenting, cleaning and labeling, image preprocessing, and developing appropriate models and pipelines, each solution

## Machine Learning Solutions

Some startups need a proof of concept and the Gravitate team creates an MVP from scratch. [Adding AI/ML capabilities](#) can accelerate product development, improve user experience, and add more IP and value for future rounds of funding.

Other AI/ML projects include:

- Microservice APIs
- Internal tools
- Research & development
