## All the features you need, and more

Make your life easier and engage your members

#### Data management

### Manage your community's data like a pro

Import & export member data

Import all your members along with all their profile data into your database; Export your member data whenever you want as a universal CSV file

Powerful search & targeting filters

Target members by group, industry, location, or any custom field when promoting an event or sending a communication

Mass updates

Perform mass updates to your member database base with peace of mind, knowing that you won't lose data

Profile-update campaign

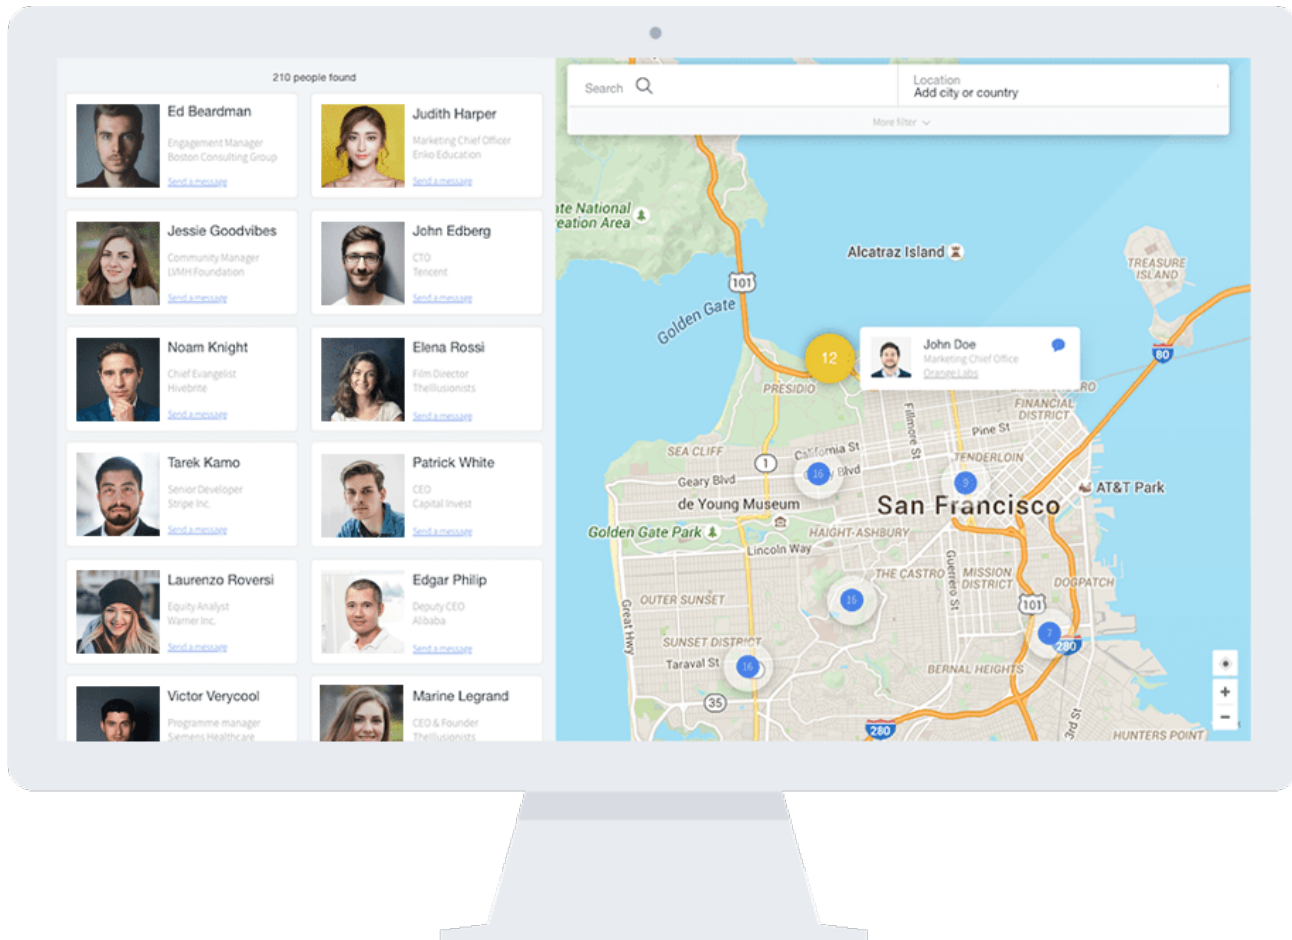

Run streamlined update campaigns that allow your members to confirm/update specific profile information without even having to login to the platform

Profile update tracker

Keep track of all profile updates made by you or your members

#### Data management

### Manage your community's data like a pro

**Import & export member data**

Import all your members along with all their profile data into your database; Export your member data whenever you want as a universal CSV file

**Powerful search & targeting filters**

Target members by group, industry, location, or any custom field when promoting an event or sending a communication

**Mass updates**

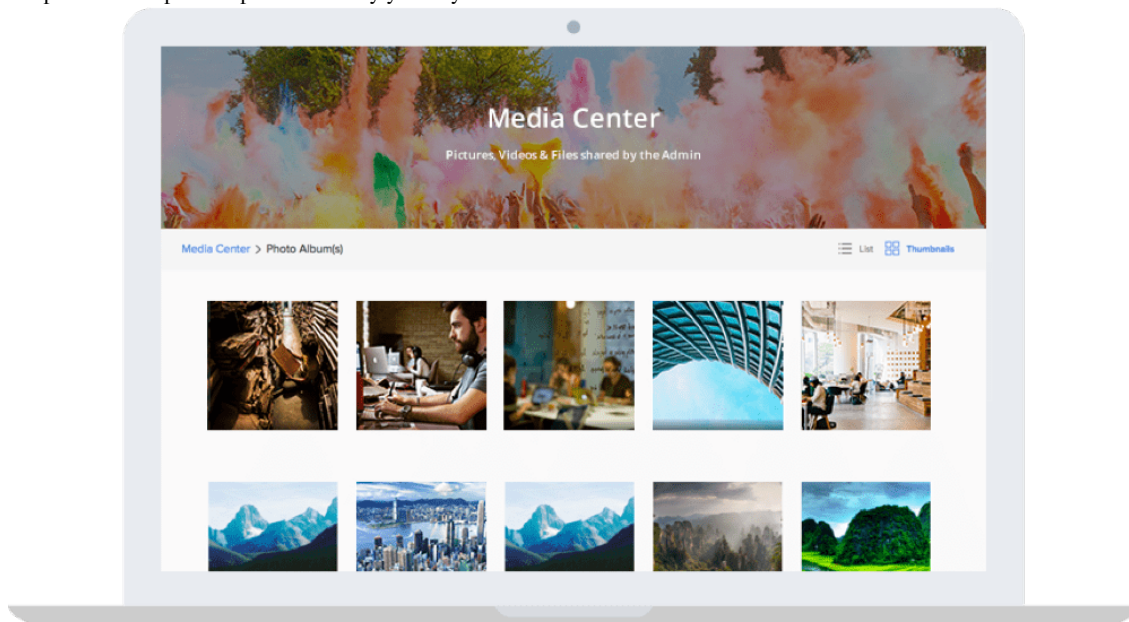

Perform mass updates to your member database base with peace of mind, knowing that you won't lose data

**Profile-update campaign**

Run streamlined update campaigns that allow your members to confirm/update specific profile information without even having to login to the platform

**Profile update tracker**

Keep track of all profile updates made by you or your members

**Content management**

**Add, update, and moderate content easily**

Full moderation

Control all content published by your members. Get immediate notifications of new publications. Edit or delete as needed

Integrated CMS

Create public pages and menus. Customize your members' area. Manage the content on your platform from your back-office

Visibility

Make some content open to visitors on your public pages. Make other content private and visible to only your members

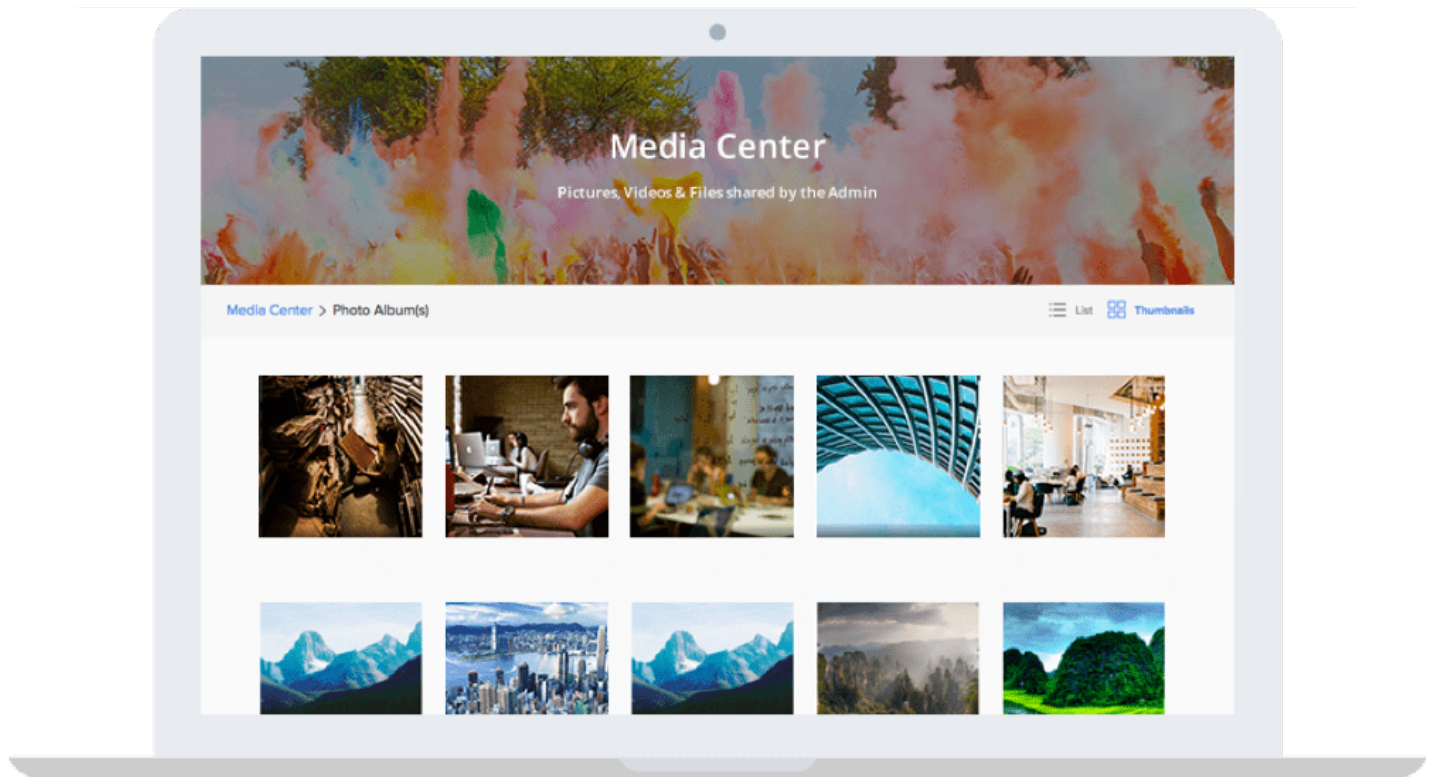

RSS Feed

Add RSS feeds to automatically create content in your platform (news, jobs, ...)

Up-to-date content

Whether members share opportunities or list their projects, they will be requested to update their information via automatic email notifications

**News**

Post messages to the platform for your members to see. Add pictures, videos or HTML

## Media center

Give your members access to documents and files you choose to share

## Event management

### Manage all your events, tickets, and payments in one place

#### Calendar

Organize events for your community and add them to your calendar

#### Invitation emails

Send invitations and reminders to invitees based on location, industry or any custom criteria

#### Ticketing

Make available different tickets and prices for different types of members (students, staff, ...). Easily manage external participants

#### Online payments

Let users pay online through secure, major payment gateways. Effortlessly keep track of all transactions

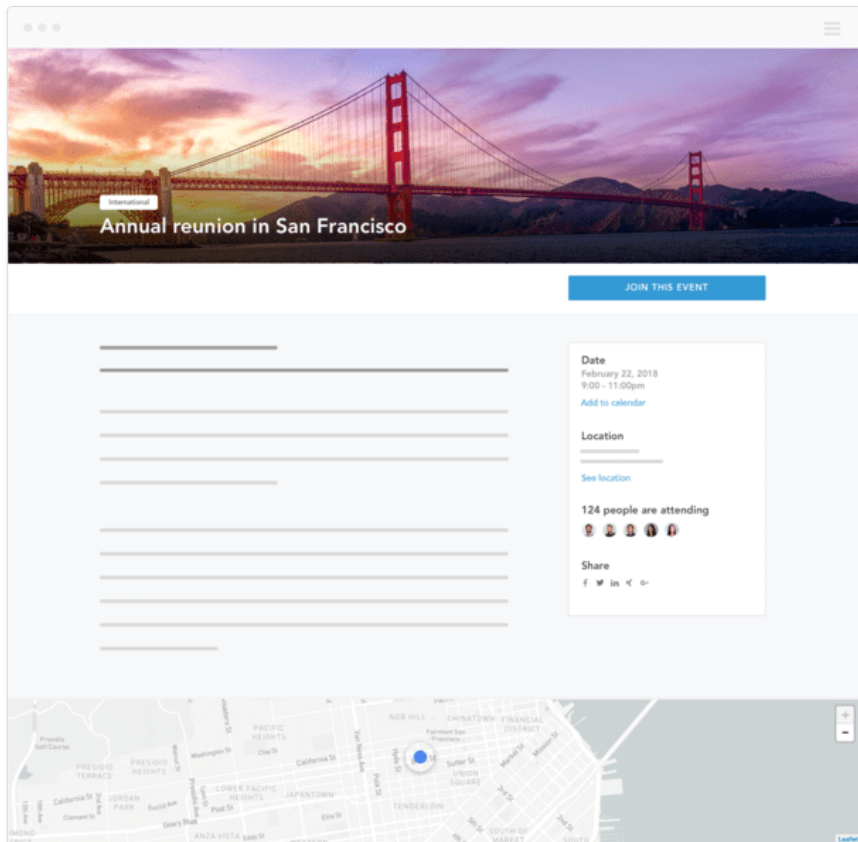

#### Social networks integration

Push your events to your Facebook, LinkedIn, and Twitter pages to boost exposure and attendance

## Event management

Send mobile campaigns to your users. Engage them through your branded mobile app

### Collaborations & opportunities

#### Share & find opportunities

Find opportunities or request for help

Activate the job board to help members to share and solicit job/internship opportunities from other members. Allow access to even more opportunities through integration of external third-party posting services

Post jobs and share opportunities

Let your members share job opportunities or showcase their availability for a new job

Share resumes

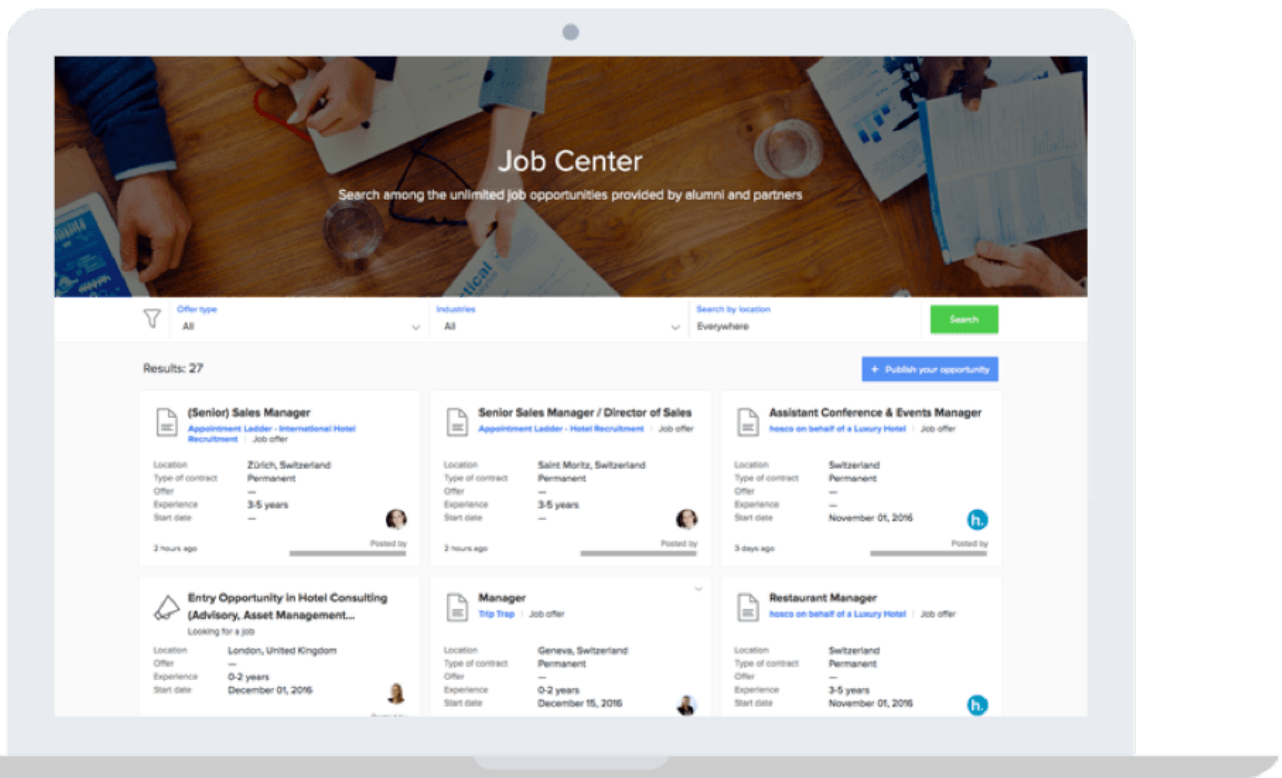

Users can upload their resume and let other community members contact them if they are interested in their profile

Connect partners, investors and co-founders

Whether they are looking for investors, co-founders, employees, or customers, your members can leverage their community network to publicize their projects and organizations

### Collaborations & opportunities

## Groups

### Create flourishing communities within your broader community with Hivebrite's advanced management of Groups

Dedicated space

Communities are often made of many smaller communities. With groups, let your members find and engage with other like-minded people in the community

Custom categories

Create groups to match your particular organizational model (clubs, chapters, industry groups, ...)

Empower group leaders

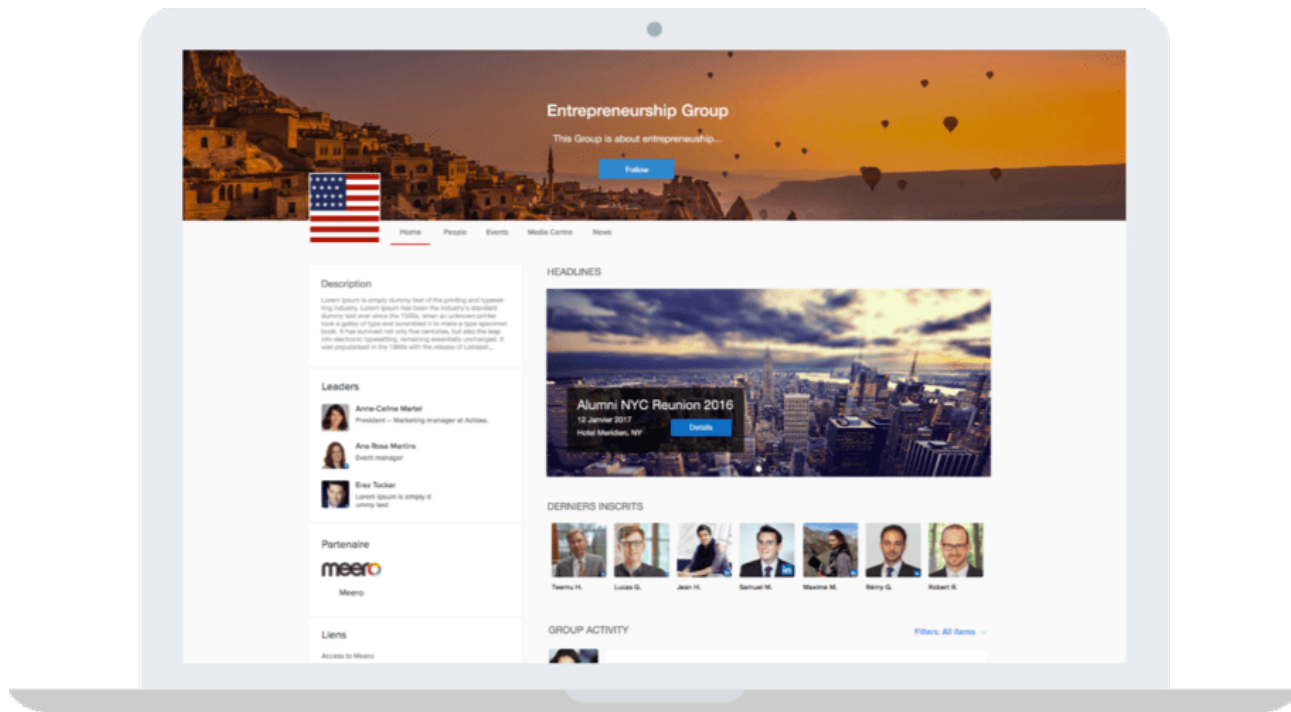

Add specific members of your community to lead, manage, or moderate the groups you create (chapter presidents, industry experts, ...)

Create group admins

Allow specific members to control aspects of their group by granting granular admin rights

**Networking**

**Facilitate networking within the community**

Check-in

Got some free time ahead of you? Check-in where you are to let nearby members know where you are and to see if they can join you

Trips

Planning a trip abroad? Let local members know you when you will be there and see who is available to meet

Direct messaging

Communicate with other members through private messages

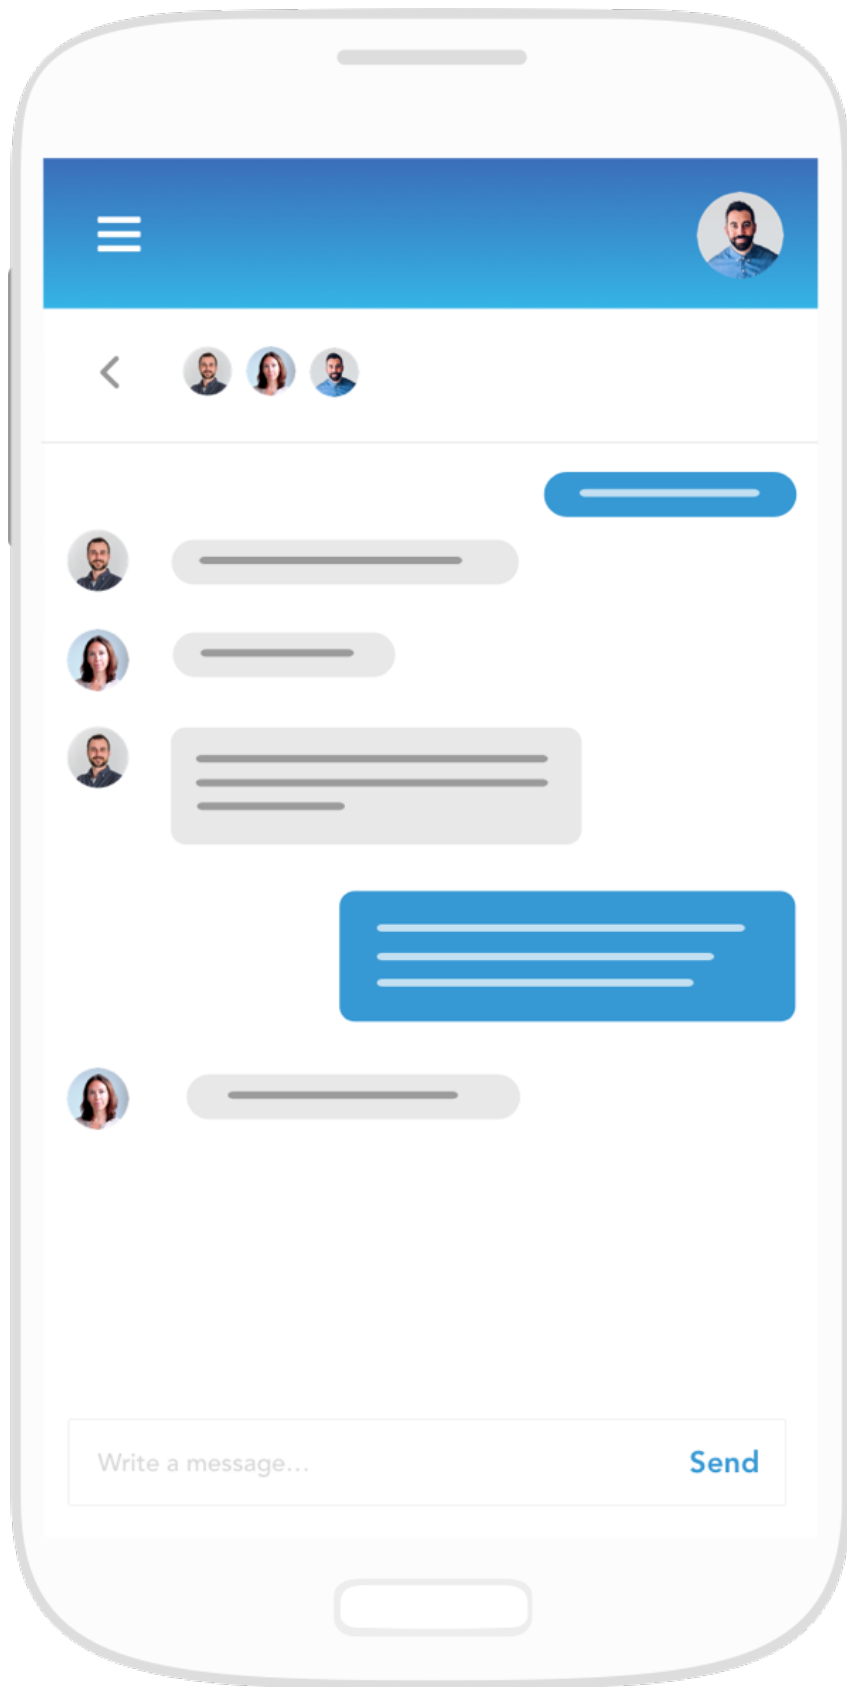

Tags

Tag people in your posts or comments to make sure they see them
