

Breakthrough payment experiences for today's on-demand world.

Episode Six enables financial institutions, fintechs, and other innovators to build new digital journeys that leverage real-time payment and value transfer—with any network, any system, any currency, anywhere in the world.

Powering experiences for:

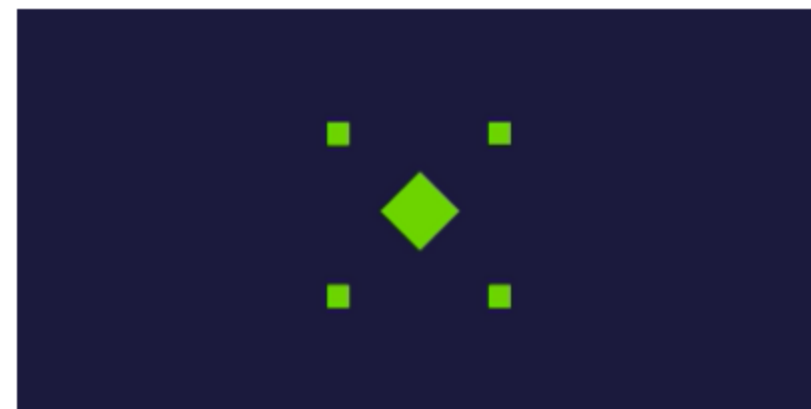

Leapfrog technology limitations so you're free to innovate.

Our platform accelerates the digital transformation of businesses by liberating them from the constraints of legacy technology—unlocking the power of creativity.

Infinitely Customizable

We offer a growing library of 550+ APIs and 100 plugins that allow you to introduce and customize almost any imaginable capability or product feature—simply and quickly.

Seamlessly Connected

Everything works together with our highly-tuned system that removes synchronization, concurrency, and IO blocks—to make transaction flow and accounting easy and complete.

Unbelievably Fast

Solutions are simple to implement and deploy—and can be used anywhere in the world. That means you can bring new products to market at lightning speed.

Unleash the power of "anything."

You get full access to all platform components centered around our digital ledger system—making any product capability available to you. If you can imagine it, you can make it a reality for your customers.

Digital Wallets and Accounts

Complex, multi-level hierarchy that can process single or multiple currencies, reward/loyalty, crypto, corporate, parent child—you name it.

[Explore Platform →](#)

Future-proofed technology for endless possibilities.

Our platform was built from scratch using advanced technology that's completely extensible—all built around one scalable, code base that can be configured any way you choose.

Advanced Technology

Our patent-pending technology is completely extensible and readily integrates with both legacy and new payment systems, networks, and service provider infrastructure—so you can get to market quickly and easily.

Our radically extensible platform accelerates digital transformation.

Develop digital journeys that customers want.

With E6, you're no longer constrained by legacy technology and are free to innovate for customers—driving loyalty, revenues, efficiencies, and long-term value along the way.

Create Unique Products

We provide the industry's most extensive set of features and functionalities via 550+ APIs. This gives you maximum flexibility to design and customize products for the unique needs of your customers.

Get to Market Faster

The E6 platform drastically cuts implementation time without cutting corners. No more waiting on third parties—you can put your products into market on your schedule.

Make Smart Enhancements

With real-time access to all data, you'll have the ability to effectively manage your analytics, as well as support for additional capabilities such as AI.

Expand Globally, Instantly

Our platform can be used anywhere in the world and supports different languages, currencies, and compliance requirements across countries and regions.

How the E6 platform works.

02

Define Relationships

Connect accounts together, many to-many, in any conceivable way with our VERTICES structuring capability.

01

Structure Accounts

Your product or service is powered by TRITIUM, our unique platform built on a dual entry digital ledger system and 550+ customizable APIs.

03

Establish Rules

04

Process Transactions

The platform integrates with all major payment network rails and can process all transaction types, e.g., purchase, ATM, P2P, ISO 8583, ISO 20022, etc.

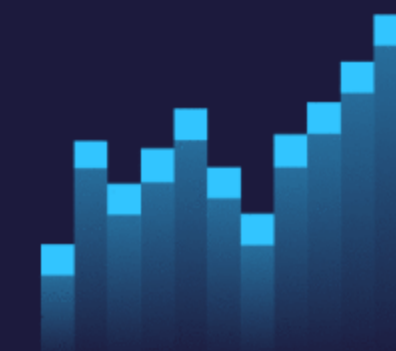

Set value exchanges, velocity checks, controls, and configure fees to drive desired customer behaviors.

05

Convert Value

Real-time authenticated value conversion of spending with any currency—crypto, loyalty points, etc.

06

Enhance Products

Leverage customer data to glean insights and make product improvements with C4, our proprietary data and reporting technology.

Bring almost **any imaginable** use case to life.

- Merchant control

—

We've invented a better way to power payments.

E6 works **seamlessly** with your existing infrastructure.

Our patent-pending technology readily integrates with both legacy and new payment systems, processors, and service provider infrastructure—to meet the service demands that today's businesses and consumers expect.

Portable Design

You can integrate E6 within an existing technology stack or use it as a standalone solution. Host it in a data center or in the cloud—whatever works best for your business.

Scalable Architecture

Add products and programs as needed with our multi-tenant architecture. You also get unprecedented scalability to handle growing capacity as your business flourishes.

Extreme Extensibility

Our incredibly flexible infrastructure was designed to allow the addition of almost any new capability or functionality—even ones we haven't thought of yet.

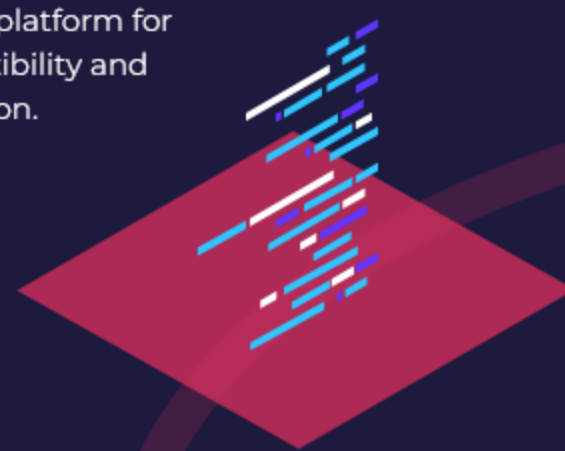

Global Compatibility

We support global currencies, languages, and regulatory requirements across countries and regions—so it's never been easier to take your business global.

The E6 technology **ecosystem**.

IONIC Technology

Bind your own code and behavior requirements to our platform for unprecedented flexibility and customization.

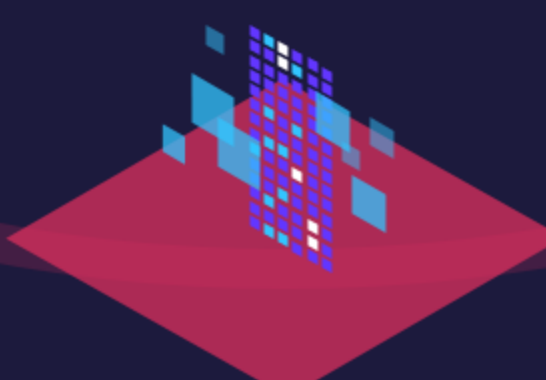

C4 Data Access

Our NoSQL DB system transforms data and reporting capabilities with instant insights into your products and easy integration into backend BI, CRM and reporting tools.

TRITIUM® Platform

E6's portable, extensible, platform featuring 550+ APIs with a single code base that can be used to create and customize almost any imaginable consumer or commercial product use case.

VERTICES Structuring

Our industry first many-to-many account structuring system that allows you to stack, build and manage digital accounts in any configuration.

One code base. 550+ APIs. Infinite possibilities.

You get maximum design flexibility and configurability in creating customer-centric products via a growing set of over 550+ APIs.

- ✓ All platform capabilities can be accessed through our extensive set of 550+ readily consumable, RESTful APIs
- ✓ Allows for full customization of any products in a simple and intuitive way
- ✓ Centrally manage all your products, anytime, anywhere in the world
- ✓ Our comprehensive online API Reference enables developers to onboard quickly

Real insights to make smarter enhancements.

C4 is our proprietary data and reporting technology that offers instant access to your data so you can actually use it in a meaningful way.

- ✓ Solves all your reporting, data science, BI and compliance needs
- ✓ Integrates easily into backend BI, CRM and reporting tools
- ✓ Eliminates the need to leverage transaction database, which preserves transactional integrity, ACID properties, and performance

See how E6 can help you make
something great.
