Setup information

The Tritium® Platform is a full-featured comprehensive dual-entry ledgering solution featuring an extensive API set, authorization transaction processor, and a value unit converter to serve your global market needs. The Tritium Control Console is an interactive customer service portal created specifically to leverage the full scope of Tritium's APIs. A new release has been made available to Company Name in the following cloud-hosted environments: EXP.

Company Name initial provisioning

Use the following credentials for the APIs and the Tritium Control Console:

Environment	URLs	Credentials
