DAN TECHNOLOGY POWER STRIP WEATHERPROOF, WATERPROOF SURGE PROTECTOR WITH 2 WIDE OUTLETS, SHOCKPROOF OUTLET EXTENDER FOR KITCHEN PATIO CHRISTMAS LIGHTS, WHITE

- 【Definition of IPX6 Waterproof】 IPX6 rated waterproof power strip can withstand rain, water splash, and even water flow. But it can't be completely submerged in water as it's not IPX8 rated. Water flows into the sockets can do no damages to the protected inner circuit due to our patented design, and it will flow out through the drainage holes on the back. Note: rubber covered switch is just for extra double safety.
- 【Electric Shockproof Outlet】 Only a US standard plug can exclusively match the deliberately designed structure of the socket, which is patented by USTPO. After then, the circuit gets truly connected and provides power for your devices. Which means foreign objects such as forks, tweezers, keys,

and even children's fingers can't get powered through these Electric Shockproof outlets.

- 【Upgraded Plug Compatibility】 Different from other brands of waterproof surge protectors that can't fit 2-prong polarized plug (one prong is a little bigger than another), our outdoor power strip has undergone a comprehensive technical upgrade. It is suitable for all types of US standard plugs, including Type-A polarized plug and type-B grounded plug. Note: it may need a little more force to insert due to the shockproof outlet design.
- 【Suit for Outdoor and Indoor】 The versatile safe waterproof power strip can be used in bathroom and kitchen where get wet by water splash, in bed room and baby room where should eliminate the risk of electric shock, in patio, deck, garden, gazebo where are humid and wet sometimes by rain. Get a waterproof outlet extender to power and guard your family. Charge safer, live happier.
