The micro-grooving consists of microscopic edges that are positioned along with the teeth in a tight spiral form. With thorough combing, these edges, together with the dragging action of the teeth, remove even the finest bit. All stainless steel teeth are welded together by laser, which makes our comb a highly sturdy and long-lasting comb. This pet de-matting comb can break up tangles and effectively remove loose hair, dander & dirt trapped beneath fur, and very curly hair. It is perfect for twisting and fluffing. Rounded pin ends are gentle to the skin. The anti-scratch teeth on our dog & cat comb naturally support the pet's health by boosting circulation. You can buy several to give as gifts to pets in the family. Easy to carry and use. Suitable for all short and long haired dogs and cats.
